

CONTENTS

INTRODUCTION	3
SUBJECTS	5
Men; non-pregnant women	6
Selected subjects	6
Group characteristics	7
Longitudinal study	10
MEDICAL RECORDS	11
BLOOD SAMPLING	11
Capillary versus venous samples	12
Postpartum blood changes	12
Blood volume	13
ANALYTICAL METHODS	14
Hemoglobin	14
Total serum protein	14
Serum vitamin C	14
Serum vitamin A and carotenoids	15
Serum alkaline phosphatase	15
DIETARY INTAKE	16
THE USUAL PHYSIOLOGICAL COURSE DURING REPRODUCTION	19
NUTRITIONAL STATUS	29
Clinical assessment	29
Dietary assessment	31
Serial biochemical assessment	35
BIOCHEMICAL ASSESSMENT	37
Hemoglobin	37
Serum total protein	43
Serum vitamin C	48
Serum vitamin A and carotenoids	55
Serum alkaline phosphatase	65
RELATIONSHIP OF COMPONENTS IN MATERNAL AND INFANT BLOOD	70
Maternal blood components	72
Infant blood components	75
Maternal — infant relationships	76
SUMMARY AND CONCLUSIONS	78
LITERATURE CITED	83
