Recent Advances in Nutritional Sciences

Werner G. Bergen and Harry J. Mersmann ......................................................... 2499

Fatty Acid Regulation of Hepatic Gene Transcription.
Donald B. Jump, Daniela Botolin, Yun Wang, Jinghua Xu, Barbara Christian, and Olivier Demeure ................................................................. 2503

Biochemical and Molecular Actions of Nutrients

Astaxanthin Diminishes Gap Junctional Intercellular Communication in Primary Human Fibroblasts.
Felicitas Daubrawa, Helmut Sies, and Wilhelm Stahl ................................................................. 2507

Megalin-Mediated Reuptake of Retinol in the Kidneys of Mice Is Essential for Vitamin A Homeostasis.
Jens Rala, Thomas E. Willnow, and Florian J. Schweigert ............................................................. 2512

Reduced Adiposity in Bitter Melon (Momordica charantia)–Fed Rats Is Associated with Increased Lipid Oxidative Enzyme Activities and Uncoupling Protein Expression.
Laureen L. Y. Chan, Qixuan Chen, Adi G. G. Go, Emily K. Y. Lam, and Edmund T. S. Li ................................................................. 2517

Proteomic Analysis Reveals Changes in the Liver Protein Pattern of Rats Exposed to Dietary Folate Deficiency.
Aurélie Chanson, Thierry Sayd, Edmond Rock, Christophe Chambon, Véronique Santé-Lhouetellier, Geneviève Potier de Courcy, and Patrick Brachet ............................................................. 2524

Scurvy Leads to Endoplasmic Reticulum Stress and Apoptosis in the Liver of Guinea Pigs.
Éva Margittai, Gábor Bánhegyi, András Kiss, Gábor Nagy, József Mandl, Zsuzsa Schaff, and Miklós Csala ............................................................. 2530

Nutrient-Gene Interactions

The Apolipoprotein E Gene Promoter (−219G/T) Polymorphism Determines Insulin Sensitivity in Response to Dietary Fat in Healthy Young Adults.
Juan Antonio Moreno, Francisco Pérez-Jiménez, Carmen Marín, Pablo Pérez-Martínez, Rafael Moreno, Purificación Gómez, Yolanda Jiménez-Gómez, Juan Antonio Paniagua, Denis Lainon, and José López-Miranda ............................................................................ 2535

Long-Chain Polyunsaturated Fatty Acids Upregulate LDL Receptor Protein Expression in Fibroblasts and HepG2 Cells.
Shaomei Yu-Poth, Dezhong Yin, Penny M. Kris-Etherton, Guixiang Zhao, and Terry D. Etherton ............................................................. 2541

Vegetables Affect the Expression of Genes Involved in Carcinogenic and Anticarcinogenic Processes in the Lungs of Female C57Bl/6 Mice.
Simone G. van Breda, Ebiennis van Agen, Suzzy van Sanden, Tomasz Burzykowski, Jos C. Kleinjans, and Joost H. van Delft ............................................................. 2546

Sangita G. Murali, David W. Nelson, Angela K. Draxler, Xiaowen Liu, and Denise M. Ney ............................................................................. 2553

Garlic Organosulfur Compounds Upregulate the Expression of the π Class of Glutathione S-Transferase in Rat Primary Hepatocytes.
Chia-Wen Tsai, Jau-Ji Yang, Haw-Wen Chen, Lee-Yan Sheen, and Chong-Kuei Lii ............................................................................. 2560

Human Nutrition and Metabolism

Arachidonic Acid Predominates in the Membrane Phosphoglycerides of the Early and Term Human Placenta.
Demetris Bitsanis, Michael A. Crawford, Therishnee Moodley, Holm Holmsen, Kebrab Ghebremeskel, and Ovrang Djahanbakhch ............................................................. 2566

Lora L. Iannotti, Kimberly O. O’Brien, Shih-Chen Chang, Jeri Mancini, Maureen Schulman-Nathanson, Shuangyou Liu, Zena L. Harris, and Frank R. Witter ............................................................. 2572

Calcium Absorption from Corn Tortilla Is Relatively High and Is Dependent upon Calcium Content and Liming in Mexican Women.
Jorge L. Rosado, Margarita Díaz, Angélica Rosas, Ian Griffit, and Olga P. García ............................................................. 2578
Anthocyanins Exist in the Circulation Primarily as Metabolites in Adult Men. Colin D. Kay, Giuseppe (Joe) Mazza, and Bruce J. Holub .......................................................................................... 2582

Community and International Nutrition

Breast-Feeding Influences Cognitive Development in Filipino Children. Melissa C. Daniels and Linda S. Adair .......................................................... 2589

The Use of NaFeEDTA-Fortified Fish Sauce Is an Effective Tool for Controlling Iron Deficiency in Women of Childbearing Age in Rural Vietnam. Pham Van Thy, Jacques Berger, Yukiyo Nakanishi, Nguyen Cong Khan, Sean Lynch, and Philip Dixon ........................................................... 2596

Nutrient Metabolism

Novel Lycopene Metabolites Are Detectable in Plasma of Preruminant Calves after Lycopene Supplementation. Tina Sicilia, Achim Bub, Gerhard Rechkemmer, Klaus Kraemer, Peter P. Hoppe, and Sabine E. Kulling .................................................. 2616

Nutrient Requirements

Twice the Amount of α-Carotene Isolated from Carrots Is as Effective as β-Carotene in Maintaining the Vitamin A Status of Mongolian Gerbils. Sherry A. Tamemhardjo and Julie A. Howe .......................................................... 2622

Selenium Bioavailability from Buckwheat Bran in Rats Fed a Modified AIN-93G Torula Yeast-Based Diet. Philip G. Reeves, Peter D. Leary, Brian R. Gregoire, John W. Finley, James E. Lindlaufer, and LuAnn K. Johnson .......................................................... 2627

Nutrient Interactions and Toxicity

Dietary (n-3) Long Chain Polyunsaturated Fatty Acids Prevent Sucrose-Induced Insulin Resistance in Rats. Ghafoornissa, Ahamed Ibrahim, Lavni Rajkumar, and Vani Acharya .......................................................... 2634

Nutritional Immunology

Nutritional Status Predicts Primary Subclasses of T Cells and the Lymphocyte Proliferation Response in Healthy Older Women. Roshni R. Molls, Namanjeet Ahrwalia, Andrea M. Mastro, Helen Smiciklas-Wright, and Gordon C. Handte .... 2644

Murine Antigen-Presenting Cells Are Multifunctional In Vitro Biosensors for Detecting the Immunoactive Potential of Bovine Milk Products. Corinne Davies, Michelle McConnell, Lynn Slobbe, Neill Haggarty, and Glenn Buchan .......................................................... 2651

Nutritional Neurosciences

Nutritional Epidemiology

Iron Status and Risk of Cancers in the SU.VI.MAX Cohort. Serge Hercberg, Carla Estaqueio, Sebastien Czernichow, Louise Memen, Nathalie Noisette, Sandrine Bertras, Jean-Charles Renversez, Serge Briant, Alain Favier, and Pilar Galan .......................................................... 2664

Vitamin A Supplementation Does Not Affect Infants’ Immune Responses to Polio and Tetanus Vaccines. Sam Newton, Simon Couzens, Seth Owusu-Agyei, Suzanne Filteau, Carolynne Stanley, Louise Linsell, and Betty Kirkwood .......................................................... 2669

The Type of Oil Used for Cooking Is Associated with the Risk of Nonfatal Acute Myocardial Infarction in Costa Rica. Edmund K. Kabagambe, Ana Baylin, Alberto Ascheto, and Hannia Campos .......................................................... 2674

Nutrition and Cancer

Daidzein-Sulfate Metabolites Affect Transcriptional and Antiproliferative Activities of Estrogen Receptor-β in Cultured Human Cancer Cells. Pierangela Totta, Filippo Acconcia, Fabio Virgili, Aedin Cassidy, Peter D. Weinberg, Gerald Rimbach, and Maria Marino. ................................................................. 2687

Symposium

Nutritional “Omics” Technologies for Elucidating the Role(s) of Bioactive Food Components in Colon Cancer Prevention

Cindy D. Davis and Norman G. Hord, Guest Editors

Nutritional “Omics” Technologies for Elucidating the Role(s) of Bioactive Food Components in Colon Cancer Prevention. Cindy D. Davis and Norman G. Hord ................................................................. 2694

Nutrigenetics in Cancer Research—Folate Metabolism and Colorectal Cancer. Cornelia M. Ulrich ....................................................... 2698

Nutritional Epigenetics: Impact of Folate Deficiency on DNA Methylation and Colon Cancer Susceptibility. Young-In Kim ................................................................. 2703

Dietary Components Modify Gene Expression: Implications for Carcinogenesis. Kan Yang, WanCai Yang, John Mariadason, Anna Velcich, Martin Lipkin, and Leonard Augenlicht ................................................................. 2710

Announcements ................................................................. 2723

Supplement: The Influence of Vitamin D on Bone Health Across the Life Cycle ................................................................. 2724S

Manuscript submission: manuscripts must be submitted using the online manuscript submission system at http://submit.nutrition.org. Instructions for the preparation and submission of manuscripts are provided in the “Instructions for Authors” available online at http://submit.nutrition.org. Authors who wish to obtain a print copy of the “Instructions for Authors” should contact the American Society for Nutrition, 9650 Rockville Pike, Bethesda, MD 20814; email: jnutrition@nutrition.org; telephone 301-634-7985; fax 301-634-7892.
