CONTENTS

ARTICLES

Recent Advances in Nutritional Sciences
The Influence of Dairy Product Consumption on Body Composition. Dorothy Teegarden ......................................... 2749

Biochemical and Molecular Actions of Nutrients
The VSL# 3 Probiotic Mixture Modifies Microflora but Does Not Heal Chronic Dextran-Sodium Sulfate–Induced Colitis or Reinforce the Mucus Barrier in Mice. Estelle Gaudier, Catherine Michel, Jean-Pierre Ségan, Christine Cherbut, and Christine Hoehler ...................... 2753
Copper Exposure Induces Trafficking of the Menkes Protein in Intestinal Epithelium of ATP7A Transgenic Mice. Jean-François Monty, Roxana M. Llanos, Julian F. B. Mercer, and David R. Kramer ...................... 2762
Resveratrol Inhibits TNF-α–Induced Proliferation and Matrix Metalloproteinase Expression in Human Vascular Smooth Muscle Cells. Beobyi Lee and Sung-Kwon Moon ..................................................... 2767

Nutrient-Gene Interactions
Vitamin A Status in Mice Affects the Histone Code of the Phosphoenolpyruvate Carboxykinase Gene in Liver. Kelly B. Scribner, Daniel P. Odom, and Mary M. McGrane ............................................. 2774
The Glycine N-Methyltransferase (GNMT) 1289 C→T Variant Influences Plasma Total Homocysteine Concentrations in Young Women after Restricting Folate Intake. Brandon Beagle, Tai Li Yang, Jean Hung, Edward A. Cogger, David J. Moriarty, and Marie A. Caudill ........................................................... 2780

Human Nutrition and Metabolism
Isoflavones and Functional Foods Alter the Dominant Intestinal Microbiota in Postmenopausal Women. Thomas Clavel, Matteo Fallani, Patricia Lepage, Florence Levenez, Jacinthe Mathay, Violaine Rochet, Michele Sérégé, Malène Sutren, Gemma Henderson, Catherine Bernetean-Pelissero, Françoise Tondut, Michael Blaut, Joël Doré, and Véronique Coxam . 2786
The Dietary α-Linolenic Acid to Linoleic Acid Ratio Does Not Affect the Serum Lipoprotein Profile in Humans. Petra L. L. Goyens and Ronald P. Mensink ............................................. 2799
Stearic, Oleic, and Linoleic Acids Have Comparable Effects on Markers of Thrombotic Tendency in Healthy Human Subjects. Myriam A.M.A. Thijssen, Gerard Hornstra, and Ronald P. Mensink . 2805

Community and International Nutrition
The Concentration of Free Holo-Retinol Binding Protein Is Higher in Vitamin A–Sufficient than in Deficient Nepalese Women in Late Pregnancy. Sandhya Sankaranarayanan, Monica Suárez, Douglas Taren, Denise Genaro-Wolf, Burris Duncan, Kamal Shrestha, Narayan Shrestha, and Francisco J. Rosales ............................................. 2817
Food Insecurity Affects School Children’s Academic Performance, Weight Gain, and Social Skills. Diana F. Jyoti, Edward A. Frongillo, and Sonya J. Jones ........................................................... 2831
Growth Indices, Anemia, and Diet Independently Predict Motor Milestone Acquisition of Infants in South Central Nepal. Emily H. Siegel, Rebecca J. Stoltzfus, Patricia K. Kariger, Joanne Katz, Subarna K. Khatry, Steven C. LeClerq, Ernesto Pollitt, and James M. Tielsch ............................................................. 2840

**Nutrient Metabolism**

Colonic Fermentation of Inulin Increases Whole-Body Acetate Turnover in Dogs. E. Pouteau, R. Frenais, H. Dumon, L. Noah, L. Martin, and P. Nguyen ................................................................. 2845

Soy Protein Containing Isoflavones Reduces the Size of Atherosclerotic Plaques without Affecting Coronary Artery Reactivity in Adult Male Monkeys. Michael R. Adams, Deborah L. Golden, J. Koudy Williams, Adrian A. Franke, Thomas C. Register, and Jay R. Kaplan ....................................................... 2852

**Nutritional Immunology**

Isomalto-Oligosaccharides Polarize Th1-Like Responses in Intestinal and Systemic Immunity in Mice. Hiroyuki Mizubuchi, Toshiki Yajima, Noriaki Aoi, Tetsuji Tomita, and Yasumitsu Yoshikai ................................................................. 2857

**Nutritional Epidemiology**

Fat Intake Is Associated with Serum Estrogen and Androgen Concentrations in Postmenopausal Japanese Women. Chisato Nagata, Yasuko Nagao, Chiken Shibuya, Yoshitomo Kashiki, and Hiroyuki Shimizu ................................................................. 2862

**Nutritional Methodology**

Development of the Indicator Amino Acid Oxidation Technique to Determine the Availability of Amino Acids from Dietary Protein in Pigs. Soenke Moehn, Robert F. P. Bertolo, Paul B. Pencharz, and Ronald O. Ball ................................................................. 2866

**Nutrition and Cancer**

Orally Administered Green Tea Polyphenols Prevent Ultraviolet Radiation-Induced Skin Cancer in Mice through Activation of Cytotoxic T Cells and Inhibition of Angiogenesis in Tumors. Sudheer K. Mantena, Syed M. Meenan, Craig A. Elmets, and Santosh K. Katiyar ................................................................. 2871

Oral Administration of *Butyrivibrio fibrisolvens*, a Butyrate-Producing Bacterium, Decreases the Formation of Aberrant Crypt Foci in the Colon and Rectum of Mice. Sou Ohkawara, Hideki Furuya, Kousuke Nagashima, Narito Asanuma, and Tsuneo Hino ................................................................. 2878

Fisetin Inhibits the Activities of Cyclin-Dependent Kinases Leading to Cell Cycle Arrest in HT-29 Human Colon Cancer Cells. Xianghua Lu, Jae in Jung, Han Jin Cho, Do Young Lim, Hyun Sook Lee, Hyang Sook Chun, Dae Young Kwon, and Jung Han Yoon Park ................................................................. 2884

**Erratum** ................................................................. 2891

**Announcements** ................................................................. 2893

**Acknowledgment** ................................................................. 2894

**Supplement: Immunonutrition: Enhancing Tumoricidal Cell Activity** ................................................................. 2896S

**Manuscript submission:** manuscripts must be submitted using the online manuscript submission system at http://submit.nutrition.org. Instructions for the preparation and submission of manuscripts are provided in the “Instructions for Authors” available online at http://submit.nutrition.org. Authors who wish to obtain a print copy of the “Instructions for Authors” should contact the American Society for Nutrition, 9650 Rockville Pike, Bethesda, MD 20814; email: jnutrition@nutrition.org; telephone 301-634-7985; fax 301-634-7892.
