## CONTENTS

### ARTICLES

#### History of Nutrition

Nutritional Studies in Victorian Prisons. Kenneth J. Carpenter ............................................. 1

#### Biographical Article

Helen Gertrude Oldham (1903–2004). Ruth Pike and Helen Smiciklas-Wright ........................... 9

#### Biochemical, Molecular, and Genetic Mechanisms

Induction of Hepatic Antioxidant Enzymes by Phenolic Acids in Rats Is Accompanied by Increased Levels of Multidrug Resistance–Associated Antioxidant Protein 3 mRNA Expression. Chi-Tai Yeh, and Gou-Chin Yen .......... 11

Identification of the Regulatory Region of the L-Type Pyruvate Kinase Gene in Mouse Liver by Hydrodynamics-Based Gene Transfection. Takayuki Suzuki, Masanobu Kawamoto, Atsushi Murai, and Tatsuo Muramatsu .......... 16

Copper Transport Protein (Crt1) Levels in Mice Are Tissue Specific and Dependent on Copper Status. Yien-Ming Kuo, Anna A. Gybina, Joshua W. Pyatskowit, Jane Gitschier, and Joseph R. Prohaska .................................................. 21

Rapamycin Inhibits Liver Growth during Refeeding in Rats via Control of Ribosomal Protein Translation but Not Cap-Dependent Translation Initiation. Padmanabhan Anand and Philip A. Gruppuso .......... 27

#### Nutrient Physiology, Metabolism, and Nutrient-Nutrient Interactions

Orally Administered Betaine Has an Acute and Dose-Dependent Effect on Serum Betaine and Plasma Homocysteine Concentrations in Healthy Humans. Ursula Schwab, Anneli Terroinen, Esa Meririnne, Markku Saarinen, Georg Alfthan, Antti Aro, and Matti Uusitupa ................................................................. 34

Rat Gastrointestinal Tissues Metabolize Quercetin. Brigitte A. Graf, Clement Ameho, Gregory G. Dolukowski, Paul E. Milbury, Chung-Yen Chen, and Jeffrey B. Blumberg .......................................................... 39

Of the Major Phenolic Acids Formed during Human Microbial Fermentation of Tea, Citrus, and Soy Flavonoid Supplements, Only 3,4-Dihydroxyphenylacetic Acid Has Antiproliferative Activity. Kun Gao, Anlong Xu, Cyrille Krul, Koen Venema, Yong Liu, Yantao Niu, Jinxiu Lu, Liath Bensoussan, Navindra P. Seeram, David Heber, and Susanne M. Henning .................................................. 52

Colonic Fermentation May Play a Role in Lactose Intolerance in Humans. Tao He, Marion G. Priebe, Hermie J. M. Harmsen, Frans Stellwaard, Xiaohong Sun, Gjalt W. Wellin, and Roel J. Vosk ................................................................. 58

Increased Colonic Luminal Synthesis of Butyric Acid Is Associated with Lowered Colonic Cell Proliferation in Piglets. C. Laurence Kien, Mary Schmitz-Brown, Travis Solley, Dayong Sun, and Wendy L. Frankel .......................... 64

Dietary Fructooligosaccharides Affect Intestinal Barrier Function in Healthy Men. Sandra J. M. Ten Bruggencate, Ingeborg M. J. Bovee-Oudenhoven, Mischa L. G. Lettink-Wissink, Martijn B. Katan, and Roelof van der Meer .................................................. 70
Nutrition and Disease

Soy Isoflavones Alter Expression of Genes Associated with Cancer Progression, Including Interleukin-8, in Androgen-Independent PC-3 Human Prostate Cancer Cells. Renita Handayani, Lori Rice, Yuehua Cui, Theresa A. Medrano, Von G. Samedi, Henry V. Baker, Nancy J. Szabo, and Kathleen T. Shriver .................................................. 75

Flaxseed Oil Increases the Plasma Concentrations of Cardioprotective (n-3) Fatty Acids in Humans. Charles R. Harper, Megan J. Edwards, Andrew P. DeFilips, and Terry A. Jacobson ................................................................. 83

Beef Tallow Increases the Potency of Conjugated Linoleic Acid in the Reduction of Mouse Mammary Tumor Metastasis. Neil E. Hubbard, Debora Lim, and Kent L. Erickson .................................................. 88

Fish Oil Affects Blood Pressure and the Plasma Lipid Profile in Healthy Danish Infants. Camilla T. Damsgaard, Lene Schack-Nielsen, Kim F. Michaelsen, Maj-Britt Friukilde, Ole Helg, and Lotte Lauritzen .................................................. 94

Consumption of Soy Isoflavones Does Not Affect Plasma Total Homocysteine or Asymmetric Dimethylarginine Concentrations in Healthy Postmenopausal Women. Manja Reimann, Jutta Dirkes, Anja Carlsoh, Duncan Talbot, Manika Ferrari, Jesper Hallund, Wendy L. Hall, Katerina Vafeiadou, Ulrich Huebner, Francesco Branca, Susanne Bagel, Christine M. Williams, H.-J. Franz Zunfj, and Corinna Koelnick .................................................. 100

Lycopene Supplementation Prevents Smoke-Induced Changes in p53, p53 Phosphorylation, Cell Proliferation, and Apoptosis in the Gastric Mucosa of Ferrets. Chun Lii, Robert M. Russell, and Xiang-Dong Wang .................................................. 106

A Lignan Complex Isolated from Flaxseed Does Not Affect Plasma Lipid Concentrations or Antioxidant Capacity in Healthy Postmenopausal Women. Jesper Hallund, Gitte Ravn-Haren, Susanne Bügel, Tine Tholstrup, and Inge Tetes . 112

Nutrient Requirements and Optimal Nutrition

Dietary Inulin Intake and Age Can Affect Intestinal Absorption of Zinc and Copper in Rats. Charles Coudray, Christine Feillet-Coudray, Elyett Gueux, Andrej Mazur, and Yves Rayssiguier .................................................. 117

Dietary Vitamin A Has Both Chronic and Acute Effects on Vitamin A Indices in Lactating Rats and Their Offspring. Sylvie A. Akhoue, Joanne Balmer Green, and Michael H. Green .................................................. 128

 Excessive Weight Gain during Pregnancy Is Associated with Earlier Termination of Breast-Feeding among White Women. Julie A. Hilson, Kathleen M. Rasmussen, and Chris L. Kjølhede .................................................. 140

Nutritional Epidemiology

Dietary Saturated Fat Intake Is Inversely Associated with Bone Density in Humans: Analysis of NHANES III. Rebecca L. Corwin, Terry J. Hartman, Steven A. Maczuga, and Barry I. Graubard .................................................. 159

Community and International Nutrition

Psychosocial Factors and Socioeconomic Indicators Are Associated with Household Food Insecurity among Pregnant Women. Barbara A. Lartera, Maria Siega-Riz, Craig Gandersen, and Nancy Dole .................................................. 177

Nutritional Immunology

Ingestive Behavior and Neurosciences

PYY[3-36] Administration Decreases the Respiratory Quotient and Reduces Adiposity in Diet-Induced Obese Mice.
Sean H. Adams, Chunli Lei, Carolyn M. Jodka, Svetlana E. Nikoulina, Julie A. Hoyt, Bronislava Gedulina, Christine M. Mack, and Eric S. Kendall .......................................................... 195

Methodology and Mathematical Modeling

In Vivo Urea Kinetic Studies in Conscious Mice. Juan C. Marini, Brendan Lee, and Peter J. Garlick ................ 202

Manuscript submission: manuscripts must be submitted using the online manuscript submission system at http://submit.nutrition.org. Instructions for the preparation and submission of manuscripts are provided in the “Instructions for Authors” available online at http://submit.nutrition.org. Authors who wish to obtain a print copy of the “Instructions for Authors” should contact the American Society for Nutrition, 9650 Rockville Pike, Bethesda, MD 20814; email: jnutrition@asns.org; telephone 301-634-7985; fax 301-634-7892.

Cover image: Cultivation of green tea in China. Copyright © Stephen Morrissey, Cortex Scientific Botanicals, Ojai, CA. Phenolic compounds contained in green tea and other dietary substances are the subject of research by Gao et al. (page 52). The nutritional properties of phenolic compounds and flavonoids are also discussed in other articles in this month’s issue of The Journal of Nutrition (Yeh and Yen, page 11; Graf et al., page 39; Cassidy et al., page 45; Handayani et al., page 75; Reimann et al., page 100; and Baker et al, page 166).
