Is your lab animal diet run-of-the-mill?

Commonly used chow-based diets are comprised of many agricultural ingredients which vary with source and season. It is impossible to know exactly what you are feeding your experimental animal if their diet is run-of-the-mill.

Know what you are feeding. Control the composition of this crucial reagent in your experiments. Contact our Resource Center at info@researchdiets.com to know and control what you’re feeding. Your results could depend on it.
The Pennsylvania State University seeks candidates for a tenure track faculty position starting Fall 2006 in the area of nutrition related to Assistant Professor of Nutritional Genomics. Applicants should submit a cover letter of application, a curriculum vitae, and a personal statement addressing interests and vision regarding research, teaching, and the applicant’s ability to help address the university’s goal to increase diversity. The names, titles and email addresses of three references who may be contacted should be included. Please address materials to: Dr. Catharine Ross, Professor, Chair of the Nutrigenomics Search Committee, Department of Nutritional Sciences, College of Health & Human Development, The Pennsylvania State University, Job #: B-21450, S-126 Henderson Building, University Park, PA 16802.

The successful applicant will be a collaborator within the biomedical emphasis area and would be an interface with the Departments of Biological Sciences and Bioengineering and the Greenwood Genetic Center. This individual will also be expected to build strong collaborations with the South Carolina Nutrition Research Consortium (http://www.scnrc.org/) to enhance our ability to focus on the discovery of basic mechanisms that could be used in the development of strategies to prevent nutrition related diseases, and to build a nationally recognized integrated molecular nutrition graduate program.

This position offers competitive startup funds and an attractive salary. Laboratory space will be provided in the Department of Food Science & Human Nutrition with ample opportunities to access cutting edge research instrumentation for high throughput functional genomics and proteomics housed in the Genomics Institute and the Department of Genetics and Biochemistry.

To apply, submit a letter of application, curriculum vitae, statements of teaching and research interests, and the names and addresses of three potential references as a single PDF file to Dr. Felix Barron at fbarron@clemson.edu. Please include “Metabolomics” in the subject heading. Applications not in a single PDF file will be returned and must be resubmitted in the correct format. Deadline for receipt of applications is February 7, 2006. We especially encourage minorities and women to apply.

Clemson University is committed to affirmative action, equal opportunity, and the diversity of its workforce. “Clemson University does not discriminate against any person or group on the basis of age, color, disability, gender, national origin, race, religion, sexual orientation, or veteran’s status.” An offer of employment is contingent upon establishment of identity and verification of employment eligibility as required by the Immigration Reform and Control Act of 1986.
Assistant/Associate Professor (Tenure Track): Micronutrient Research

The Program in Human Nutrition in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health is establishing a tenure track faculty position to conduct research and teach in areas of micronutrient physiology, assessment, and deficiency prevention. The ideal candidate would be a translational researcher, who combines solid expertise and interest in biological mechanisms of micronutrient function, including interactions with other nutrients and disease states, with a sound understanding of public health nutrition and epidemiology. The faculty member would develop his/her independent program in a specific nutrient(s) and disease relationships, while also working with a multidisciplinary team involved in preventing micronutrient deficiencies across the life stages in underserved populations. A broad, global vision of micronutrient deficiencies and health, and experience in cross-cultural and international research will be highly desirable. Depending on seniority, an established record of independent funding may also be expected.

Please send letter of interest and curriculum vita to Laura E. Caulfield, PhD, Program Director, Program in Human Nutrition, Department of International Health, The Johns Hopkins University, Bloomberg School of Public Health, 615 North Wolfe Street, Room W2041, Baltimore, MD 21205 Tel: 410-955-2786; email: lcaulfie@jhsph.edu

Johns Hopkins University actively encourages interest from women and minorities and is an affirmative action/equal opportunity employer.

Assistant/Associate Professor (Non-Tenure Track): Micronutrient Deficiency Prevention

The Program in Human Nutrition in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health is establishing a non-tenure track faculty position to conduct research and teach in areas of micronutrient deficiency control and prevention. The successful candidate must have strong, demonstrated skills in nutritional assessment and epidemiologic research methods as well as a sound understanding of the nutritional and health problems facing low income countries. Working with a multidisciplinary research team, the faculty member will assume responsibilities for conducting epidemiologic investigations and controlled trials to test efficacy and safety of micronutrient and other nutrition interventions. Possessing cross-cultural sensitivities and, preferably, language skills, s/he should be willing to work for extended periods of time in the conduct of collaborative micronutrient deficiency assessment and prevention research outside the United States, especially in Southern Asia and/or Africa.

Please send letter of interest and curriculum vita to Laura E. Caulfield, PhD, Program Director, Program in Human Nutrition, Department of International Health, The Johns Hopkins University, Bloomberg School of Public Health, 615 North Wolfe Street, Room W2041, Baltimore, MD 21205 Tel: 410-955-2786; email: lcaulfie@jhsph.edu

Johns Hopkins University actively encourages interest from women and minorities and is an affirmative action/equal opportunity employer.
The State University of New Jersey
RUTGERS
Professor and Chair of Nutritional Sciences

The Department of Nutritional Sciences of Rutgers University seeks a renowned scientist to chair and build the department to a level of international prominence. To make a significant impact on human health, Rutgers has targeted nutrition and its health consequences as a principal area for programmatic growth. The successful candidate will take a leadership role through the recruitment of new faculty, the development of major new facilities, and the fostering of multidisciplinary research and training programs. Nutritional Sciences is located at Cook College, Rutgers’ school of food and environmental sciences and site of its Land Grant mission and activities, and there are ongoing collaborations with other Cook departments including Animal Sciences, Plant Biology and Pathology, Food Science, and Biotechnology. Nutritional Sciences is also part of a vibrant life sciences research community at Rutgers University, including major programs in structural biology, molecular, cellular and developmental biology, neuroscience, the Stem Cell Institute of New Jersey, the Cancer Institute of New Jersey, the Center for Advanced Biotechnology and Medicine, the Center of Alcohol Studies, the Environmental and Occupational Health Sciences Institute, the Human Genetics Institute, The School of Public Health, and the Robert Wood Johnson Medical School. The campus is located in central New Jersey, close to New York City, Philadelphia, beaches, and countryside.

The Nutritional Sciences Department has 17 full-time faculty members involved in undergraduate, graduate, and outreach programs. The faculty’s research areas include lipid metabolism, calcium and bone development, energy expenditure and obesity, amino acid metabolism, child nutrition, community nutrition, and health promotion (http://nutrition.rutgers.edu/). The successful candidate will strengthen and extend the department’s research areas in health and clinical fields involving the etiology, prevention, and treatment of nutrition-related diseases, including obesity, diabetes, CVD, cancer and osteoporosis. The successful candidate will direct the Nutritional Sciences Department, direct the department’s research and educational programs, and oversee faculty mentoring.

Qualifications
The successful candidate must have a Ph.D. and/or M.D. or their equivalent and a record of distinguished research and scientific leadership. The successful candidate should have strong interpersonal skills and a sustained record of peer-reviewed publications and research funding. The successful candidate will be provided with a highly competitive salary, significant start-up support and laboratory space, and substantial administrative support. This is a tenure track position.

Inquiries and nominations should go to Dr. Michael A. Gallo, Professor, Environmental and Occupational Medicine, Robert Wood Johnson Medical School, 170 Frelinghuysen Rd., Piscataway, NJ, 08854 (magallo@eohsi.rutgers.edu).

A letter of application, curriculum vita, names of four or more professional references, and a statement of research and leadership objectives should be sent by electronic or regular mail to Ms. Phyllis Lepucki, Rm 004, Martin Hall, 88 Lipman Drive, Cook College, Rutgers, The State University of New Jersey, New Brunswick, NJ 08901 (lepucki@aesop.rutgers.edu). A review of applications will begin on February 15, 2006 and continue until a suitable candidate is identified. Starting date is negotiable, on or after July 1, 2006.

Rutgers University is an Equal Opportunity/Affirmative Action Employer
Assistant, Associate, or Full Professor of Veterinary Nutrition, 11 mo., tenure-track. Salary dependent on qualifications and experience. Required: PhD in nutrition or related field, strong research program/advanced training in large animal nutrition, documented research record/high potential to develop an independent research program in animal nutrition, demonstrated ability in acquisition of extramural funding, demonstrated experience/aptitude in teaching in nutrition, possess excellent interpersonal and communication skills and a demonstrated ability to work with others in a collegial team atmosphere. Preferred (not required): DVM/PhD or equivalent, competence in herbivore nutrition/experience in clinical equine nutrition. Apply by February 6, 2006; position open until filled. Submit letter outlining special interest in the position, overall research qualifications, experience and career goals; cv; 3 publications; and names and addresses of 3 professional references to: Dr. Robert Hansen, Chair, Dept of Molecular Biosciences, School of Vet. Medicine, University of CA, Davis, CA 95616-8741. Email: rjhansen@ucdavis.edu. UCD is an AA/EoE.

UNIVERSITY OF TORONTO
Faculty of Medicine

Assistant Professor in Nutritional Sciences

The Department of Nutritional Sciences in the Faculty of Medicine invites applications for a tenure-track Assistant Professorship. The research interests of the Department include public health, clinical and basic nutrition, profiled on www.utoronto.ca/nutrisci/. Applications are encouraged from candidates with an excellent record of research accomplishments in any area of human nutrition relating to human health and disease. Successful candidates will be expected to mount an independent, externally funded research program and to participate in some teaching at the undergraduate or graduate level.

Applicants should send curriculum vitae, description of research interests, and the names and addresses of 3 references by March 15, 2006 to: Dr. Michael C. Archer, Chair, Department of Nutritional Sciences, Faculty of Medicine, University of Toronto, FitzGerald Building, 150 College St., Toronto, ON, Canada M5S 3E2. m.archer@utoronto.ca. Phone: 416-978-8195. Fax: 416-971-2366.

The University is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups and others who may contribute to further diversification of ideas. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.

ASSISTANT/ASSOCIATE PROFESSOR
PUBLIC HEALTH NUTRITION, MCH FOCUS

The Program in Public Health Nutrition, Department of Nutrition at the University of Tennessee invites applications for a 9-month tenure-track Assistant/Associate Professor. The University welcomes and honors people of all races, genders, creeds, cultures, and sexual orientations, and values intellectual curiosity, pursuit of knowledge, and academic freedom and integrity. Candidates for this position must have an earned doctorate in nutrition or closely related area with relevant research experience in the area of human nutrition. Responsibilities include research/teaching in public health nutrition and MCH nutrition. Evidence of a successful research program and quality teaching are expected for rank of Associate Professor. The candidate should have a background in public health nutrition and an affinity for student advising and mentoring. R.D. status is desirable. Available August 1, 2006. Position open until filled. Applicants should submit letters detailing research and teaching goals, curriculum vitae, names and contact information of three references by February 1, 2006: Lisa Jahns, Ph.D., The University of Tennessee, 1215 W. Cumberland Ave., 229 JHB, Knoxville, TN 37996-1920, E-mail: ljahns@utk.edu, http://cehhs.utk.edu/news/positions/pos_prof_nutr_mch.html

The University of Tennessee is an EEO/AA/Title VI/Title IX/Section 504/ADA/ADEA institution in the provision of its education and employment programs and services.

Department of Foods and Nutrition
and Food Science or Psychology
Purdue University

Applicants are sought for a tenure-track research/teaching position at the assistant, associate or full professor level at Purdue University. It will be a joint position in the Departments of Foods and Nutrition (primary) and either Food Science or Psychology (secondary). The successful candidate is expected to establish a research program related to sensory, metabolic or neural signals related to feeding. Preference will be given to applicants with interests and expertise in one of the following areas: energy balance, metabolism, fitness; bone health; or botanicals. An emphasis in the former area is particularly desired because of a recent University-based emphasis on cluster hires in obesity research and newly established Ingestive Behavior Research Center (IBRC). Collaborations with faculty in existing strong program areas of appetite, chemosensory function, energy balance, neurobiology, behavior, bioactive peptides and/or functional foods is expected. Qualifications include a record of scholarly activity as evidenced by publications and successful grantsmanship. Salary will be commensurate with experience. Initial screening of applications will begin January, 2006 and continue until a successful applicant is identified. The application, including: 1) a description of current and planned scholarly activity; 2) a CV; and 3) the names, addresses, email and telephone numbers of three persons willing to serve as references, should be mailed to: Richard D. Mattes, M.P.H., Ph.D., R.D., Search Committee Chair, Department of Foods and Nutrition, 1264 Stone Hall, Purdue University, West Lafayette, IN 47907-2059, Phone: 765-494-0662 Fax: 765-494-0674 rmattes@purdue.edu. Purdue University provides the resources and amenities of a Big Ten University in a setting that offers a high quality of life. Purdue is an Equal Access/Equal Opportunity/Affirmative Action Employer.
Meet in Salt Lake City in 2006!

Subscribe to The Journal of Nutrition . . .

The premier journal for the publication of research findings in nutrition.

The Journal of Nutrition was the first in the field to provide a forum for nutrition professionals. The Journal is a highly valued resource for scientists world-wide who need timely and accurate information on all important aspects of nutrition research.

Key areas covered:
- Biochemical and Molecular Action of Nutrients
- Metabolomics
- Nutrient-Gene Interactions
- Human Nutrition and Metabolism
- Community and International Nutrition
- Nutrient Metabolism
- Nutrient Requirements
- Nutrient Interactions and Toxicity
- Nutritional Immunology
- Nutritional Neurosciences
- Nutrition and Aging
- Nutrition and Cancer
- Nutritional Epidemiology

Strict Protocol.

You Develop the Protocol. We’ll Develop the Diet.

Because your work is so important, our nutritional experts have been developing precise formulations for researchers, for decades...one diet at a time. We also understand your need to add or eliminate certain components in a diet in order to better monitor your research.

Whether you need to delete, or add nutritional components or medications to one of our respected LabDiet® formulations, or create an entirely new grain based or purified ingredient diet, we can do it at TestDiet®. We’ll produce a custom formulation from scratch, in any batch size, to meet your special needs.

Visit us at www.TestDiet.com for details or call 765 966-1885 and put TestDiet® to the test.

To request a free copy of “The Essentials of Custom Diets for Laboratory Animals”, go to email at www.TestDiet.com.
