Temple University
2007-2008 Tenure Track, Open Rank Faculty Searches

Temple University's Center for Obesity Research and Education is recruiting several tenure track faculty to support the Center's focus on improving the understanding of obesity in order to better prevent and treat this national epidemic. The Center is looking to expand its faculty in the areas of exercise physiology, epidemiology, basic science and pediatric obesity although candidates demonstrating excellence in any area related to obesity research are encouraged to apply. The newly formed Center has a large feeding lab, a dedicated DEXA and extensive faculty and staff office space. Each faculty member of the Center also has an appointment in one of the University's 17 schools and colleges. The Center is especially interested in individuals who could be appointed to the University's departments in Public Health or Kinesiology, both of which are a part of a large and vibrant health sciences center. There also are ample opportunities for collaborating across disciplines.

Each applicant must have a doctoral degree, a publication history appropriate to the rank of appointment and a successful program of research that includes a record of external research funding (senior candidates) or the potential for such a program of research (junior candidates).

Each applicant must submit a curriculum vitae, a statement of research interest, a statement of graduate or undergraduate teaching interests, three letters of recommendation, and copies of representative publications to Gary D. Foster, Ph.D., Professor of Medicine and Public Health and the Director of the Center for Obesity Research and Education, 3223 North Broad Street, Suite 175, Philadelphia, PA 19140 or by email to gary.foster@temple.edu.

Precise Nutrient Delivery • Free of Compromising Contaminants •
GLP Certified Facility • Patented Mixing Technology • DEA Licensed •
State of the Art Diet Design • Staff Experience: 11 Years Average •
Convenient Location, Expert Service

AIN-76A, AIN-93G, AIN-93M Purified Diets
with or without custom modifications

Custom Cereal, Purified and L-Amino Acid Diets

We carry a complete line of diet ingredients

Drosophila Media

Call for a current catalog describing our full line of cereal-based, purified and L-AA diets. We also carry a full line of diet ingredients, liquid diets and liquid diet drinking tubes.

Recruiters: Don’t miss this important message!

TO: Recruiters wanting to promote open positions, fellowship opportunities, programs, or conference announcements.

TIME: Now

MESSAGE: The Journal of Nutrition and The American Journal of Clinical Nutrition are the perfect way to advertise to research scientists, physicians, & registered dieticians. And now the full issues of each journal are made available online in a pdf format. So your ad gets additional exposure online for free. Also, frequency discounts are given for running ads in both journals.

NOTE: Quarter, half, and full page ad sizes are available. Issues close the first of the month preceding the issue month.

ACTION REQUESTED: Email your ad to adnet@faseb.org for a quote.

The American Society for Nutrition
NUTRITION SCIENCE JOURNALISM AWARD

NOMINATIONS MUST BE POSTMARKED BY OCTOBER 6, 2006

QUALIFICATIONS:
The Nutrition Science Journalism Award is given by the American Society for Nutrition (ASN) for consistent, accurate nutrition science reporting for a general audience over the last year. The award honors an individual (rather than institutions or employers) for his or her achievements in nutrition science journalism. The winning journalist will have helped to foster the public’s understanding and appreciation of current nutrition issues based on science. The nomination packet should address the following and the number in parenthesis indicates the maximum points scored during the review process:

• Is consistently scientifically accurate (25)
• Covers current nutrition issues with balance and perspective (25)
• Has broad audience reach (20)
• Is creative in presentation of material (15)
• Regularly quotes credible health professionals, including ASN members (15)

Advertising, special advertising sections or advertorials are not eligible for consideration.

NOMINATIONS MUST INCLUDE:
1. A letter stating the significance and impact of work, covering all criteria listed above.
2. A curriculum vitae or resume of the nominee.
3. Selected samples of the nominee's work such as print materials, audio and/or videotapes. Each sample must be labeled with information on date of use of publication and “reach” of the communication.
4. Application form.

APPLICATION AND SELECTION:
1. Submit one original of the candidate’s nomination packet postmarked by October 6, 2006 as only those nominations postmarked by this date will be considered.
2. Selection will be based on the application packet and above established criteria for the award. Self nominations are encouraged. The candidate’s vitae must be included.
3. The maximum of 3 letters of support may accompany the application packet. The Selection Committee will only review support letters in the application packet.
4. Nominators should combine efforts in preparing one nomination packet. Selection is not influenced by multiple entries.
5. The award will be presented at the ASN annual meeting. Reasonable travel and hotel expenses of the awardee will be reimbursed.

NOTIFICATION:
1. Once the Selection Committee has selected the award winner, notification will be sent to the awardee and the originator of the application.
2. If applicable, one originator will be selected to write the award citation.
3. Those applications of nominees not selected will be returned to the originator. The Association will not notify unsuccessful nominees.

A nomination form is available on the following webpage: http://www.nutrition.org/awards/jrnlsm_a.pdf

Please submit the nomination packet to: The American Society for Nutrition (ASN), 9650 Rockville Pike, Suite 3300 • Bethesda, MD 20814-3998

NOMINATIONS MUST BE POSTMARKED BY OCTOBER 6, 2006
For decades, our customers have requested special diets to meet their specific research needs. The animal nutrition experts at TestDiet® formulate both custom grain-based and purified-ingredient diets from scratch.

Specialized diets for research involving transgenic mice are just some of the examples of the focused formulations we create for our customers. And, we can deliver these diets in any batch size required for your study, even as small as two kilograms.

At TestDiet, we can delete or add nutritional components or even medications to one of our respected LabDiet formulations to your exact specifications. But more importantly, we can even produce an entirely new diet formulation for your research needs and deliver it fresh from our lab to yours.

For more information about TestDiet, visit www.testdiet.com or contact us at Info@TestDiet.com.
Researchers around the world discuss their diverse custom research diet needs with Harlan Teklad nutritionists. Whether adding a compound to a diet, or developing a unique formula, Teklad nutritionists can help you achieve your research objectives. Contact Teklad today, and together, your input and our expertise will enhance your work.
