Is your lab animal diet run-of-the-mill?

Commonly used chow-based diets are comprised of many agricultural ingredients which vary with source and season. It is impossible to know exactly what you are feeding your experimental animal if their diet is run-of-the-mill.

Know what you are feeding. Control the composition of this crucial reagent in your experiments. Contact our Resource Center at info@researchdiets.com to know and control what you’re feeding. Your results could depend on it.

Where NutriPhenomics™ Begins
UNIVERSITY OF MASSACHUSETTS AMHERST
TWO TENURE-TRACK FACULTY POSITIONS
DEPARTMENT OF NUTRITION

One Assistant/Associate Professor with preferred areas of interest related to obesity, diabetes, and chronic disease prevention; antioxidants or bioactive food components; and the role of nutrients in genetic, hormonal or immune responses. One Assistant Professor with preferred areas of interest related to basic and applied nutrition research in aging, maternal and child nutrition, women’s health, or dietary interventions. For both positions, Ph.D. in Nutrition or closely related field required. Post-doctoral research experience preferred, R.D. desirable. Must have strong demonstrated ability or potential in research and teaching, and ability to communicate effectively both orally and in writing. Duties include: Establish and develop an active research program with an independent base of support funds; advise undergraduate nutrition majors and guide graduate student research; teach undergraduate and graduate-level nutrition courses to a diverse body of student learners; develop courses in areas of expertise.

Starting Date: September 1, 2006. Review of applications will begin February 15, 2006 and continue until positions are filled. Please submit a cover letter with statement of accomplishments and future research plans along with a curriculum vitae, and arrange for three letters of reference to be sent to: Dr. Mokhtar Atallah, Department of Nutrition, 210 Chenoweth Laboratory, University of Massachusetts, Amherst, MA 01003-9282; matallah@nutrition.umass.edu (413) 545-0740.

The University of Massachusetts is an Affirmative Action/Equal Opportunity Employer. Women and members of minority groups are encouraged to apply.

An ISO 9001:2000 Certified Company
Assistant/Associate Professor (Tenure Track): Micronutrient Research

The Program in Human Nutrition in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health is establishing a tenure track faculty position to conduct research and teach in areas of micronutrient physiology, assessment, and deficiency prevention. The ideal candidate would be a *translational* researcher, who combines solid expertise and interest in biological mechanisms of micronutrient function, including interactions with other nutrients and disease states, with a sound understanding of public health nutrition and epidemiology. The faculty member would develop his/her independent program in a specific nutrient(s) and disease relationships, while also working with a multidisciplinary team involved in preventing micronutrient deficiencies across the life stages in underserved populations. A broad, global vision of micronutrient deficiencies and health, and experience in cross-cultural and international research will be highly desirable. Depending on seniority, an established record of independent funding may also be expected.

Please send letter of interest and curriculum vita to Laura E. Caulfield, PhD, Program Director, Program in Human Nutrition, Department of International Health, The Johns Hopkins University, Bloomberg School of Public Health, 615 North Wolfe Street, Room W2041, Baltimore, MD 21205 Tel: 410-955-2786; email: lcaulfie@jhsph.edu

Johns Hopkins University actively encourages interest from women and minorities and is an affirmative action/equal opportunity employer.

Assistant/Associate Professor (Non-Tenure Track): Micronutrient Deficiency Prevention

The Program in Human Nutrition in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health is establishing a non-tenure track faculty position to conduct research and teach in areas of micronutrient deficiency control and prevention. The successful candidate must have strong, demonstrated skills in nutritional assessment and epidemiologic research methods as well as a sound understanding of the nutritional and health problems facing low income countries. Working with a multidisciplinary research team, the faculty member will assume responsibilities for conducting epidemiologic investigations and controlled trials to test efficacy and safety of micronutrient and other nutrition interventions. Possessing cross-cultural sensitivities and, preferably, language skills, s/he should be willing to work for extended periods of time in the conduct of collaborative micronutrient deficiency assessment and prevention research outside the United States, especially in Southern Asia and/or Africa.

Please send letter of interest and curriculum vita to Laura E. Caulfield, PhD, Program Director, Program in Human Nutrition, Department of International Health, The Johns Hopkins University, Bloomberg School of Public Health, 615 North Wolfe Street, Room W2041, Baltimore, MD 21205 Tel: 410-955-2786; email: lcaulfie@jhsph.edu

Johns Hopkins University actively encourages interest from women and minorities and is an affirmative action/equal opportunity employer.
The Department of Bioscience and Biotechnology at Drexel University invites applicants for a tenure track position in the Division of Nutrition and Food Science. The successful candidate must have a Ph.D. in nutrition or a related field and will take a leading role in the division which is doing dynamic research in basic and clinical nutrition sciences. The candidate must have a strong research program, peer-reviewed publications, and a track record of extramural funding. The candidate will teach at both the graduate and undergraduate levels. Drexel University is located in the heart of Philadelphia, close to other major universities and has a diverse array of cultural activities.

Please send a Curriculum vitae and a statement of research and teaching interests to: Dr. Cecilie Goodrich, Chair, Search Committee for Division of Nutrition and Food Science Candidate, Department of Bioscience and Biotechnology, Drexel University, 3141 Chestnut Street, Philadelphia, PA 19104.

### Award Announcement

**The M. L. Sunde Award**

The M.L. Sunde Award recognizes outstanding experimental, applied or fundamental research on avian nutrition.

An award of $2,500 will be presented annually to the first author or authors of an outstanding research paper using an avian species in research published in *The Journal of Nutrition*. Eligible manuscripts will be reviewed by an Award Jury. The selection of the awardee will be based on the long term value of the research to the poultry industry and to mankind.

*The M.L. Sunde Award is made available by the M.L. Sunde Endowment Fund.*

### Department of Foods and Nutrition and Food Science or Psychology

**Purdue University**

Applicants are sought for a tenure-track research/teaching position at the assistant, associate or full professor level at Purdue University. It will be a joint position in the Departments of Foods and Nutrition (primary) and either Food Science or Psychology (secondary). The successful candidate is expected to establish a research program related to sensory, metabolic or neural signals related to feeding. Preference will be given to applicants with interests and expertise in one of the following areas: energy balance, metabolism, fitness; bone health; or botanicals. An emphasis in the former area is particularly desired because of a recent University-based emphasis on cluster hires in obesity research and newly established Digestive Behavior Research Center (IBRC). Collaborations with faculty in existing strong program areas of appetite, chemosensory function, energy balance, neurobiology, behavior, bioactive peptides and/or functional foods is expected. Qualifications include a record of scholarly activity as evidenced by publications and successful grantmanship. Salary will be commensurate with experience. Initial screening of applications will begin January, 2006 and continue until a successful applicant is identified. The application, including: 1) a description of current and planned scholarly activities; 2) a CV; and 3) the names, addresses, email and telephone numbers of three persons willing to serve as references, should be mailed to: Richard D. Matto, M.P.H., Ph.D., R.D., Search Committee Chair, Department of Foods and Nutrition, 1264 Stone Hall, Purdue University, West Lafayette, IN 47907-2059, Phone: 765.494.0662 Fax: 765.494.0674 matto@purdue.edu Purdue University provides the resources and amenities of a Big Ten University in a setting that offers a high quality of life. Purdue is an Equal Access/Equal Opportunity/Affirmative Action Employer.

Subscribe to The Journal of Nutrition . . .

The premier journal for the publication of research findings in nutrition.

The Journal of Nutrition was the first in the field to provide a forum for nutrition professionals. The Journal is a highly valued resource for scientists world-wide who need timely and accurate information on all important aspects of nutrition research.

Key areas covered:
- Biochemical and Molecular Action of Nutrients
- Metabolomics
- Nutrient-Gene Interactions
- Human Nutrition and Metabolism
- Community and International Nutrition
- Nutrient Metabolism
- Nutrient Requirements
- Nutrient Interactions and Toxicity
- Nutritional Immunology
- Nutritional Neurosciences
- Nutrition and Aging
- Nutrition and Cancer
- Nutritional Epidemiology

Subscriptions to the print version of The Journal of Nutrition include access to The Journal of Nutrition Online at www.nutrition.org.

**Our Constant Nutrition isn’t necessarily for everyone.**

Our parent company PMI operates over 75 mills that manufacture fixed formula products for animals like these pictured here.

While we understand that fixed formula feeds are more economical to make, our data shows that their nutritional levels can vary a great deal. That’s why we’ll never create fixed formula products for LabDiet at our plant in Richmond, Indiana. Because we know your work is too important to introduce any unknown variable into your laboratory animals’ diets.

For this reason we assay nutritional levels of our raw grains everyday. So we can fine tune our formulations to guarantee our promise of Constant Nutrition to you, our customers.

LabDiet is a registered trademark of Purina Mills, LLC*  
*Your work is worth it.™*
Dedication to the research community is a key ingredient in every Harlan Teklad Product.

Custom research diets are an important tool for your research involving all types of laboratory animals. Teklad custom research diets are used in the study of atherosclerosis, obesity, insulin resistance, diabetes, cancer, hypertension, stroke, toxicology, gene induction, renal disease, pancreatitis, neurological disorders, and other areas. We are dedicated to quality in all aspects of ingredient selection, diet formulation and production, and customer service. We also supply ingredients for those who prepare their own diets. Contact our knowledgeable technical staff to discuss your specific diet needs. Together, your input and our expertise will enhance your research.
