CONTENTS

ARTICLES

Recent Advances in Nutritional Sciences

Nutrients Regulate the Colonic Vitamin D System in Mice: Relevance for Human Colon Malignancy.
Heide S. Cross, Martin Lipkin, and Enikő Källay .......................................................... 561

Nutrient Physiology, Metabolism, and Nutrient-Nutrient Interactions

Dietary-Induced Changes in Fatty Acid Composition of Human Plasma, Platelet, and Erythrocyte Lipids Follow a Similar Time Course. C. Murray Skeaff, Leanne Hudson, and Joanne E. McKenzie .................. 565
cis-9, trans-11 Conjugated Linoleic Acid Is Synthesized Directly from Vaccenic Acid in Lactating Dairy Cattle.
Erin E. Mosley, Bahman Shafii, Peter J. Moate, and Mark A. McGuire .................................. 570
Manju B. Reddy, Richard F. Hurrell, and James D. Cook .................................................. 576
Chronic Intake of High-Fat and High-Sucrose Diets Differentially Affects Glucose Intolerance in Mice.
Maho Sumiyoshi, Masahiro Sakakura, and Yoshiyuki Kimura ........................................... 582
Hydrolysis of Zeaxanthin Esters by Carboxyl Ester Lipase during Digestion Facilitates Micellarization and Uptake of the Xanthophyll by Caco-2 Human Intestinal Cells. Chureeporn Chitchumroonchokchai and Mark L. Failla .......................................................... 588
Iodine Deficiency Mitigates Growth Retardation and Osteopenia in Selenium-Deficient Rats. Rodrigo Moreno-Reyes, Dominique Egrise, Marleen Boelaert, Serge Goldman, and Sylvain Meuris .................................................... 595
Hypo and Hyper-Response to Egg Cholesterol Predicts Plasma Lutein and β-Carotene Concentrations in Men and Women. Richard M. Clark, Kristin L. Herron, David Waters, and Maria Luz Fernandez ............................... 601

Nutrition and Disease

The Production of Reactive Oxygen Species and the Mitochondrial Membrane Potential Are Modulated during Onion Oil–Induced Cell Cycle Arrest and Apoptosis in A549 Cells. Xin-jiang Wu, Thorsten Stahl, Ying Hu, Fekadu Kassie, and Volker Mersch-Sundermann .......................................................... 608
Virgin Olive Oil Phenols Inhibit Proliferation of Human Promyelocytic Leukemia Cells (HL60) by Inducing Apoptosis and Differentiation. Roberto Fabiani, Angelo De Bartolomeo, Patrizia Rosignoli, Maurizio Servili, Roberto Selvaggini, Gian Francesco Montedoro, Cristina Di Saverio, and Guido Morozzi ........................................... 614

Nutritional Epidemiology

The Consumption of Lycopene and Tomato-Based Food Products Is Not Associated with the Risk of Type 2 Diabetes in Women. Lu Wang, Simin Liu, JoAnn E. Manson, J. Michael Gaziano, Julie E. Buring, and Howard D. Sesso .............. 620
Long-Term Stability of Food Patterns Identified by Use of Factor Analysis among Swedish Women. P. K. Newby, Christoph Weismayer, Agneta Akesson, Katherine L. Tucker, and Alicja Wolk ........................................... 626

Community and International Nutrition

Asian Adolescents Have a Higher Trunk:Peripheral Fat Ratio than Whites. Rachel Novotny, Yihe G. Daida, John S. Grove, Loïc Le Marchand, and Vinutha Vijayadeva ........................................... 642
Malnourished Children Treated in Day-Hospital or Outpatient Clinics Exhibit Linear Catch-Up and Normal Body Composition. Janaina das Neves, Paula A. Martins, Ricardo Sesso, and Ana L. Sawaya

An Infant and Child Feeding Index Is Associated with the Nutritional Status of 6- to 23-Month-Old Children in Rural Burkina Faso. Prosper S. Sawadogo, Yves Martin-Prével, Mathilde Savy, Yves Kameli, Pierre Traissac, Alfred S. Traoré, and Francis Delpeuch

Nutritional Immunology

Functional Diversity of Flavonoids in the Inhibition of the Proinflammatory NF-κB, IRF, and Akt Signaling Pathways in Murine Intestinal Epithelial Cells. Pedro A. Ruiz and Dirk Haller

Goat Milk Oligosaccharides Are Anti-Inflammatory in Rats with Hapten-Induced Colitis. Abdelali Daddaoua, Victor Puerta, Pilar Requena, Antonio Martínez-Pérez, Emilia Guadix, Fermín Sánchez de Medina, Antonio Zarzuelo, María Dolores Suárez, Julio José Boza, and Olga Martínez-Augustin

Methodology and Mathematical Modeling

Fat Supplements Affect Fractional Rates of Ruminal Fatty Acid Biohydrogenation and Passage in Dairy Cows. Kevin J. Harvatine and Michael S. Allen

Issues and Opinions

Dietary Recommendations and Identified Research Needs for The National Children’s Study. Nancy Potischman, Barbara E. Cohen, and Mary Frances Picciano

Symposium

Nutrients, Nuclear Receptors, Inflammation, and Immunity

Peroxisome Proliferator-Activated Receptors and Liver X Receptors in Atherosclerosis and Immunity. Grant D. Barish

Nutrients, Nuclear Receptors, Inflammation, Immunity Lipids, PPAR, and Allergic Asthma. Avery August, Cynthia Mueller, Veronika Weaver, Tiffany A. Polanco, Elizabeth R. Walsh, and Margherita T. Cantorna

Nuclear Receptors and Autoimmune Disease: The Potential of PPAR Agonists to Treat Multiple Sclerosis. Michael K. Racke, Anne R. Gocke, Mark Muir, Asim Diab, Paul D. Drew, and Amy E. Lovett-Racke

Letters to the Editor

Need for Optimal Body Composition Data Analysis Using Air-Displacement Plethysmography in Children and Adolescents. Duncan Radley and David A. Fields

Reply to Radley and Fields. Anja Bosy-Westphal and Manfred J. Müller

Erratum

Announcements

Manuscript submission: manuscripts must be submitted using the online manuscript submission system at http://submit.nutrition.org. Instructions for the preparation and submission of manuscripts are provided in the “Instructions for Authors” available online at http://submit.nutrition.org. Authors who wish to obtain a print copy of the “Instructions for Authors” should contact the American Society for Nutrition, 9650 Rockville Pike, Bethesda, MD 20814; email: jnutrition@asns.org; telephone 301-634-7985; fax 301-634-7892.

Cover image: Red peppers, a source of several carotenoids. Carotenoids are the subject of research in a number of articles in this issue (see pages 588, 601, 620). Copyright © 2005, Alex Ross.
