Is your lab animal diet run-of-the-mill?

Commonly used chow-based diets are comprised of many agricultural ingredients which vary with source and season. It is impossible to know exactly what you are feeding your experimental animal if their diet is run-of-the-mill.

Know what you are feeding. Control the composition of this crucial reagent in your experiments. Contact our Resource Center at info@researchdiets.com to know and control what you’re feeding. Your results could depend on it.
Martek Biosciences Corporation announces a national search for an Executive Director – Scientific Affairs that explains, advocates, and builds support for the Company's products and product candidates in the scientific and business community. This position requires an individual equally comfortable in scientific and business environments, with the ability to convey the needs and expectations of each to the other. The successful candidate will have an entrepreneurial mindset as well as an advanced degree in a scientific discipline. Martek offers a competitive salary and a comprehensive benefits package.

Please visit Martek's website, www.martekbio.com for a complete job description and other career opportunities. Resumes/applications can be submitted to jobs@martekbio.com or faxed to 410-772-5811.

Martek Biosciences Corporation is an Equal Opportunity Employer. M/F/V/D
Our Constant Nutrition isn’t necessarily for everyone.

Our parent company PMI operates over 75 mills that manufacture fixed formula products for animals like these pictured here.

While we understand that fixed formula feeds are more economical to make, our data shows that their nutritional levels can vary a great deal. That’s why we’ll never create fixed formula products for LabDiet at our plant in Richmond, Indiana. Because we know your work is too important to introduce any unknown variable into your laboratory animals’ diets.

For this reason we assay nutritional levels of our raw grains everyday. So we can fine tune our formulations to guarantee our promise of Constant Nutrition to you, our customers.

For product information: www.labdiet.com or call us at 1-800-227-8941. LabDiet is a registered trademark of Purina Mills, LLC

Your work is worth it.™
For decades, the tough research calls have come our way.

Harlan Teklad is a world leader in the formulation and manufacture of custom research diets, for customers with a wide array of scientific goals. Innovative specialists are here to answer your questions, listen to your needs, and find the solution best for you.
