Introducing the new name for purified-ingredient diets.

Research Diets, Inc. has redefined purified-ingredient lab animal diets with the introduction of OpenSource Diets™. Unlike grain-based chows, OpenSource Diet formulas can be repeated and revised again and again. Since each nutrient is supplied by a separate purified ingredient you are in control of what you are feeding.

Control the composition of this crucial reagent in your experiments with OpenSource Diets™. A product of Research Diets, Inc. Contact our Resource Center at info@researchdiets.com to learn more.
25 Exceptional speakers will present and discuss the issues surrounding the health crises of preventable disease, nutrition and policy as they relate to the 2010 Dietary Guidelines.

Complete program and registration materials available online. Sponsorship opportunities are available.

Make plans to attend. September 19 - 21, 2006 in Boston, Massachusetts. For more information, visit the web site or call 617-636-3718.

Associate Dean, Research
College of Agricultural, Consumer and Environmental Sciences (ACES)
University of Illinois at Urbana-Champaign

Position Description and Major Responsibilities: The Associate Dean, Research provides leadership and administrative oversight of the domestic and international research programs of the College of ACES and is responsible for management of the research activities of the Illinois Agricultural Experiment Station. The Associate Dean, Research reports to the Dean of the College and works closely with the Associate Dean, Academic Programs, and the Associate Dean, Extension and Outreach, as well as the department heads within the College, to encourage and support the development and maintenance of a strong, dynamic research organization. The Associate Dean, Research will

- Provide visionary leadership for research and scholarly activities;
- Facilitate continued faculty excellence in research including team building of multi-disciplinary, multi-functional, multi-institutional and/or international programs;
- Develop new research capacity and associated infrastructure;
- Champion ACES research in scientific communities on and off campus;
- Stimulate formation of innovative research ideas and translation of research into practice;
- Play a key role in College-level decisions concerning resource allocation and advise the Dean on promotion and tenure;
- Utilize and invest Office of Research resources to advance scholarship.

For full job description, see http://www.aces.uiuc.edu/Announcements/index.cfm

Qualifications: Applicants must have a doctorate in a relevant field of study and qualify for a tenured faculty appointment at the rank of full professor in a College department. Desired qualifications include a recognized national and international scholarly reputation, leadership and/or administrative experience, strong interpersonal and organizational skills, an understanding of the broad mission of a land grant university, a demonstrated commitment to international activities, and acknowledgement of the importance of diverse disciplines represented by ACES research programs.

Salary: Competitive and commensurate with experience and qualifications.

Applications: To ensure full consideration, candidates should apply by June 15, 2006. See http://www.aces.uiuc.edu/Announcements/index.cfm for instructions.

The UIUC is an AA/EOE
The Department of Food Science is searching for assistant professor in a tenure-track position. Applications will be accepted until August 1, 2006, or until position is filled. Send letter of interest, statement of research and teaching philosophy, curriculum vitae including a list of research support and publications, and names of four references to: Dr. Bruce Hamaker, Search Chair; Dept. of Food Science; Purdue University; 745 Ag Mall Drive; West Lafayette, Indiana 47907-2009

QUALIFICATIONS: Ph.D. in food or life sciences, good knowledge of food science is required, potential for effective classroom teaching, and strong communication skills. Post-doctoral experience is preferred.

RESPONSIBILITIES: Develop and maintain nationally recognized innovative research program. Examine health effects of food components from whole food matrices and their biological activity, with a focus on the biology of obesity. Experience in molecular techniques involved in gene expression. Participate in interdisciplinary teams. Teach undergrad and grad courses with opportunity to develop a graduate course. Mentor graduate students. Engagement in international aspects of the discipline is desirable.

PURDUE UNIVERSITY IS AN EQUAL OPPORTUNITY/EQUAL ACCESS/AFFIRMATIVE ACTION EMPLOYER

Editor-in-Chief
The American Journal of Clinical Nutrition
Announcement of Search

The American Society for Nutrition (ASN) is conducting a search for Editor-in-Chief of The American Journal of Clinical Nutrition (AJCN), an interdisciplinary, peer-reviewed journal that publishes meritorious work in basic and clinical studies relevant to human nutrition. The AJCN is the leading journal in clinical nutrition worldwide, with subscribers on six continents, and has the highest impact factor among peer-reviewed nutrition and dietetics journals. The five-year appointment of the new Editor will begin in July 2007. Applications are due August 31, 2006.

Applicants should send a curriculum vitae and letter of interest that includes a vision of innovative plans for the scientific and educational content of the journal and its distribution in this electronic era. Detailed information about journal operations is available from the ASN Office upon request.

Subscribe to The Journal of Nutrition . . . .

The premier journal for the publication of research findings in nutrition.

The Journal of Nutrition was the first in the field to provide a forum for nutrition professionals. The Journal is a highly valued resource for scientists world-wide who need timely and accurate information on all important aspects of nutrition research.

Key areas covered:
- Biochemical and Molecular Action of Nutrients
- Metabolomics
- Nutrient-Gene Interactions
- Human Nutrition and Metabolism
- Community and International Nutrition
- Nutrient Metabolism
- Nutrient Requirements
- Nutrient Interactions and Toxicity
- Nutritional Immunology
- Nutritional Neurosciences
- Nutrition and Aging
- Nutrition and Cancer
- Nutritional Epidemiology

SYMPOSIA/CONTROVERSY PROPOSALS
(EB 2008)
San Diego, CA, April 5-9

The ASN Program Committee for EB 2008 is preparing to review submissions for Symposia/Controversy presentations at the annual meeting in San Diego CA. Participating societies include Nutrition (ASN), Physiology (APS), Pharmacology (ASPET), Pathology (ASIP), Anatomy (AAA), and American Society for Biochemistry and Molecular Biology (ASBMB). You are encouraged to propose multi-disciplinary topics.

OUTLINE THE SYMPOSIUM/CONTROVERSY AND ITS OBJECTIVES, INCLUDING AT A MINIMUM, THE FOLLOWING: You can access a template for the submission of your symposium at: http://asnutrition.org/eb2008/eb08template.htm

1. Tentative session title, potential speakers and tentative presentation titles
2. Projected timeliness and breadth of interest to membership
3. The uniqueness and need to cover the topic (Has topic been covered recently at a national meeting?)
4. FOR CONTROVERSY SESSIONS, identify the ASN Research Interest Section (RIS) that is most closely related. You can find a RIS listing on our website at: http://www.asnutrition.org/committees/2005-2006/ris.htm
5. Name, address, society affiliation, telephone, FAX and EMAIL of both organizer and co-organizer

PROPOSED SYMPOSIA SHOULD NOT EXCEED TWO HOURS AND SHOULD BE EMAILED TO THE ASN SECRETARIAT AT: ameyers@nutrition.org

DEADLINE: JANUARY 15, 2007 ---- NOW IS THE TIME!!!!!!!
Reap The Fruits Of Reliable Nutrition.

Constant Nutrition™ means constant watchfulness on every variable in the production of LabDiet® food. That begins right here in our suppliers’ fields. At LabDiet, we closely monitor our suppliers’ crops to make sure there are no chemical residues from pesticides or fertilizers that can skew your test results.

And we go further. All animal feed companies should know that climate changes, soil conditions, rain and drought can affect the nutritional profile of raw ingredients. Corn harvested from the same plot may vary in protein yield as much as 4% from year to year.

To maintain a constant level of nutrients, we at LabDiet assay ingredients every day and fine tune our production to assure you receive the exact, constant nutrient delivery defined in your research protocol. Because at LabDiet, we believe your work is worth it.
Researchers around the world discuss their diverse custom research diet needs with Harlan Teklad nutritionists. Whether adding a compound to a diet, or developing a unique formula, Teklad nutritionists can help you achieve your research objectives. Contact Teklad today, and together, your input and our expertise will enhance your work.
