ASSISTANT/ASSOCIATE PROFESSOR OF NUTRITION
The Food Science and Nutrition Department at California Polytechnic State University, San Luis Obispo, invites individuals to apply for a full-time, academic year, tenure track position starting September 8, 2008. Salary commensurate with qualifications and experience. Expertise in nutrient metabolism, micronutrients, molecular nutrition highly desirable. Additional expertise in lifecycle and/or clinical nutrition advantageous. Responsibilities include teaching lecture and laboratory courses in these areas and the supervision of undergraduate and graduate research projects. Professional development in the form of creative scholarly activity is expected. Ph.D. in Human Nutrition or a related field is required. Candidates should have a primary interest in teaching undergraduates; university-level teaching experience is desirable. Publication history advantageous. To apply, please visit WWW.CALPOLYJOBS.ORG, complete a required on-line faculty application and apply to requisition #101383. Attach electronically a cover letter; resume/curriculum vitae; copy of transcripts; and candidate's statement, including teaching philosophy and professional goals. Please see on-line posting for instructions for submitting three letters of reference and any of the required materials that cannot be attached to the on-line application. Review of applications will begin January 7, 2008; applications received after that date may be considered. Position will remain open until a suitable candidate is hired. Selected applicant will be required to submit sealed official transcripts of highest degree.

EXTENSION SPECIALIST AND ASSISTANT/ASSOCIATE PROFESSOR
COMMUNITY NUTRITION/PUBLIC HEALTH
The Extension Family & Community Development Program and the Dept. of Nutrition & Exercise Sciences at Oregon State University invite applications for a full-time, 12-month, tenure-track Extension Specialist faculty position. Rank will be either assistant or associate professor level, depending on experience and accomplishments.

Responsibilities include 80% Extension and 20% on-campus teaching. Salary is commensurate with education and experience. This position will develop statewide extension programs focused on the promotion of health and the primary prevention of nutrition-related illnesses through community-based research and programming. Programmatic areas of focus can include healthy diets, prevention and reduction of obesity and chronic diseases, food safety, reducing food insecurity, etc.

Required qualifications include a doctoral degree in a relevant field, R.D. credential, ability to conduct and apply research in real-world situations, teaching effectiveness in campus and non-campus settings, ability to work as a team member, written and oral communication skills, and a commitment to promoting diversity. For full consideration, materials must be received by October 15.

Apply online at: http://oregonstate.edu/jobs. Look for posting #0001175. Include letter of application, curriculum vitae, and names and contact information of 3-5 references.

For further information: Teresa Crowley, 541-737-1014 or teresa.crowley@oregonstate.edu. The full position announcement can be viewed at http://oregonstate.edu/jobs OSU is an AA/EOE.

Supervisory Research Physiologist/
Supervisory Research Nutritionist
Salary Range of $94,139 to $143,955 per annum

The USDA, ARS Western Human Nutrition Research Center at the University of California, Davis, invites applications for the Research Leader position in the Obesity and Metabolism Research Unit. This Unit conducts cutting-edge research in obesity and metabolism, and vitamin and mineral interventions to improve human health and function. In addition to responsibility for research leadership and management of fiscal and human resources, the candidate will conduct a strong, integrative research program on dietary modulation of the immune and antioxidant systems for disease prevention, using cutting-edge techniques to elucidate underlying mechanisms of action. Desirable qualifications include PhD or equivalent degree in immunology, nutrition, molecular biology, biochemistry or related science, working knowledge of research with human subjects and evidence of multidisciplinary team leadership. U.S. citizenship required. For details and application directions see www.usajobs.com. Direct specific questions to Drs. Lindsay H. Allen or Nancy Keim at 530 752 5268. Announcement closes October 9, 2007. USDA/ARS is an equal opportunity employer and provider.

Supervisory Research Immunologist/
Supervisory Research Molecular Biologist/Supervisory Research Nutritionist
Salary Range of $94,139 to $143,955 per annum

The USDA, ARS Western Human Nutrition Research Center at the University of California, Davis, invites applications for the Research Leader position in the Immunity and Disease Prevention Research Unit. This Unit investigates how dietary factors with anti-inflammatory and anti-oxidant properties, including phytounitrients, minerals, vitamins and fatty acids, reduce risk of infections and prevent excessive inflammation and subsequent chronic diseases. In addition to research leadership and management of fiscal and human resources, the candidate will conduct a strong, integrative research program on dietary modulation of the immune and antioxidant systems for disease prevention, using cutting-edge techniques to elucidate underlying mechanisms of action. Desirable qualifications include PhD or equivalent degree in immunology, nutrition, molecular biology, biochemistry or related science, working knowledge of research with human subjects and evidence of multidisciplinary team leadership. U.S. citizenship required. For details and application directions see www.usajobs.com. Direct specific questions to Drs. Lindsay H. Allen or Susan Zunino at 530 752 5268. Announcement closes October 9, 2007. USDA/ARS is an equal opportunity employer and provider.

Online Continuing Education Approved for Dieticians
*Vibrio vulnificus* in Raw Oysters - What you should know

*Vibrio vulnificus* (Vv) in raw oysters is among the most virulent foodborne pathogens with a case fatality rate of 53 percent. “*Vibrio vulnificus: A Dietician’s Guide to Prevention*” is an innovative, online course that gives dieticians concise, practical information about *Vibrio vulnificus* and those at greatest risk of illness. Because dieticians play a critical role in educating patients about health and nutrition, this training was developed to enhance their ability to prevent Vv infection by educating at-risk consumers that includes those with Liver Disease (from hepatitis, cirrhosis, alcoholism, or cancer); Iron Overload Disease (hemochromatosis); Diabetes; Cancer (including lymphoma, leukemia, Hodgkin’s Disease); or any illness or medical treatment that weakens the body’s immune system.

Developed in consultation with CDC and NOAA, this online course is interactive, informative, and engaging. The course is available to Registered Dietitians (RD) and Dietetic Technicians, Registered (DTR) at no cost.

SEARCH DEADLINE EXTENDED

Professor and Coordinator of the Functional Foods Initiative
University of Connecticut

Professor, Nutritional Sciences, 80% research and 20% teaching, 9 month appointment, tenured (or tenure track).

**Start Date:** January 2008 (negotiable).

**The Position:** The successful candidate for this position will be expected to lead and coordinate a multidisciplinary Functional Foods Research and Educational Initiative at the University of Connecticut. The University has committed four tenured/tenure track positions (including this one) to this initiative, which is also supported by an endowment. The appointee will play a key role in reinforcing the mission, direction and oversight of the research and teaching program, and will be expected to guide and manage its future activities.

In addition to its primary focus of basic research into functional foods, and studying their mechanisms of action, the program will emphasize the transfer of these research findings to industry and the public in general. He/she will be expected to forge links with researchers at the University of Connecticut Health Center and to collaborate with both the program’s faculty and other colleagues in seeking grants and contracts from federal agencies and industry.

**Qualifications and Requirements:** The successful candidate must have a PhD in nutritional sciences or a relevant discipline. He or she should be a full professor, or be eligible for promotion to the rank of full professor, and have a demonstrated record of outstanding research in the area of functional foods. Excellent oral and written communication skills are an essential requirement of this position, as is the ability to lead and manage a research team.

**Related Information:** This faculty appointment will be in the Department of Nutritional Sciences, which is one of eight departments in the College of Agriculture and Natural Resources. The Department’s research programs include the areas of molecular and cellular nutrition, metabolism, and community-based research. More information about the Department may be found at http://www.canr.uconn.edu/nusci/

**TO APPLY:** Send your curriculum vitae with a statement of research interest/experience, and the names, addresses, e-mail addresses, and phone numbers of five references to: Dr. Ian Hart, Associate Dean for Research and Advanced Studies, Chair of the Search Committee, University of Connecticut, 1392 Storrs Road, Unit 4010, Storrs, CT 06269-4010. Applications and supporting materials will be reviewed beginning November 16, 2007 and will continue until the position is filled. Please direct enquiries to Dr. Hart at ian.hart@uconn.edu. The University of Connecticut is an Equal Opportunity/Affirmative Action employer and actively seeks diversity among its employees. (Search # 2007143)

We're flattered that our competitors have tried to duplicate our model. The worldwide use and publication of our High Fat DIO Diets has encouraged other manufacturers to offer similar diets based on our "Original" formulas.

There is only one way to ensure that you match a diet referenced in the scientific literature -- go to the source of the formula. The only place to get original formula OpenSource Diets is from Research Diets, Inc.

### Quality and Service are built in, not added on.

Quality and Service are two ingredients that go into every one of the more than 300 diets we produce at our LabDiet® ISO 9002-2000 production facility. Each one is designed to perform in a precise, quantifiable manner, for specific research protocols.

Our network of Certified LabDiet® Dealers provide knowledgeable assistance, clean warehouses, and timely delivery of the widest range of lab animal diets in the industry. And, they can provide an unbroken chain of documentation from our Richmond plant to your door.

You’ll find LabDiet® in the most prestigious research facilities around the world. And if a LabDiet® product doesn’t exactly match your study’s requirements, our TestDiet® facility will work with you to custom formulate the exact diet to fit your protocol.

For more information: www.labdiet.com or call us at 1 800 227-8941
