Dedication to the research community is a key ingredient in every Harlan Teklad Product.

Custom research diets are an important tool for your research involving all types of laboratory animals. Teklad custom research diets are used in the study of atherosclerosis, obesity, insulin resistance, diabetes, cancer, hypertension, stroke, toxicology, gene induction, renal disease, pancreatitis, neurological disorders, and other areas. We are dedicated to quality in all aspects of ingredient selection, diet formulation and production, and customer service. We also supply ingredients for those who prepare their own diets. Contact our knowledgeable technical staff to discuss your specific diet needs. Together, your input and our expertise will enhance your research.

Selenoprotein expression and the response to influenza in mice
Inadequate dietary protein and the desire to eat
Standardized terminology for estimation of diet-dependent net acid load
Appraisal of the concept of Total Antioxidant Capacity
Do you believe 24/7 nutrition is important to your work?

Our Certified LabDiet® Dealer network will never let you down. You know we’ve been unsurpassed in quality products since 1942. Our Richmond production plant just celebrated its 10th year as the first and only ISO 9001-2000 Certified facility of its kind.

Quality and Service have been the core values of our brand for over 60 years. No one in the industry has a stronger chain of proven and reliable distribution than LabDiet. That’s why top research facilities all over the world rely on our brand of Constant Nutrition® 24/7.

Ask one of our respected experts about our products or let us custom formulate a diet for you at our TestDiet® facility. We promise, we’ll never waste your time.
