Founded in 1928, the American Society for Nutrition (ASN) is the preeminent professional organization of nutrition research scientists throughout the world. ASN members are active researchers and key policy makers from major academic, government and corporate settings. ASN, a constituent society of the Federation of American Societies for Experimental Biology (FASEB) and a sponsor of Experimental Biology, is the authoritative voice on nutrition.

The Annual Research Conference on Food, Nutrition and Cancer
where the latest research and its applications are reported, analyzed and debated.
November 6 and 7, 2008
Capital Hilton Hotel
Washington, DC

Topics Include:
• Vitamin D and Cancer
• Dietary Supplement and Cancer
• Epigenetics and Cancer
• Behavioral Change and Cancer
• Cancer Survivorship
• Current Topics in Nutrition and Cancer

Position available: Assistant/Associate/Full Professor of Ruminant Nutrition

Position is located at the Veterinary Medical Teaching and Research Center (VMTRC) in Tulare, CA. Salary dependent on qualifications and experience. PhD in Ruminant Nutrition or a related field is required. DVM or equivalent preferred. Documented evidence of research activity and/or ability is required. Experience or knowledge in one of the following areas (i.e. nutrient excretion by ruminants, environmental stewardship, farm nutrient balances, and impacts of cattle nutrition/management on air, water and soil quality) is preferred. Familiarity with production practices common to California’s livestock production systems is desired, particularly large scale dairy production. Evidence of, or potential for leadership and initiative is desired. Demonstrated ability/experience in teaching, particularly clinical instruction, is preferred. Documented record of creative scholarship or potential to develop an independent clinical research program in applied ruminant nutrition is required with knowledge and experience in agroecosystem health preferred. The candidate must possess excellent interpersonal and communication skills and a demonstrated ability to work with others in a collegial team atmosphere. Documentation of applied expertise and competence in ruminant nutrition is required. Teaching responsibilities include: 1) participation in lectures and laboratories in the DVM professional curriculum; 2) teaching in the VMTRC; 3) participation in the graduate clinical (resident) training program of the VMTH; and 4) participation in the graduate academic programs (MS and PhD) of the campus.

Clinical: the position includes a 30% clinical commitment to maintain a teaching program with cooperator dairy herds, calf ranch operations, and feedlots. The individual will be responsible for directing, instructing and supervising veterinary students and residents; activity in all areas of ration formulation; problem solving of nutritional and metabolic origin; nutrient management and agroecosystem health; providing nutrition service to clients; and advising and consulting with referring veterinarians and clients.

Research: the position will emphasize the interaction of ruminant nutrition and dairy production. Development of an innovative research program in the areas of air and/or water quality, environmental stewardship, and other nutrition-related issues as they apply to dairy production and management in California and the West is preferred. The successful applicant will be expected to develop strong partnerships with members of the dairy and beef industries in California. The successful applicant will be expected to contribute to post-graduate training and incorporate postdoctoral residents in food systems/production medicine into these projects.

Service: University and public service through committee work, participation in professional organizations, continuing education and other appropriate means is required.

To receive fullest consideration, applications must be received by September 2, 2008; position open until filled. Interested applicants should submit 1) a letter of intent outlining special interest in the position, overall related qualifications and experience and career goals; 2) curriculum vitae; and 3) the names and addresses of four professional references to: Dr. P.H. Kass, Chair, Attn: Debra Amundson (dmhill@ucdavis.edu), Department of Population Health and Reproduction, School of Veterinary Medicine, University of California, Davis, CA 95616. The University of California is an affirmative action/equal opportunity employer.

Editor-in-Chief

**NUTRITION REVIEWS®**

Announcement of Search

The International Life Sciences Institute (ILSI) is welcoming applications for the position of Editor-in-Chief of *Nutrition Reviews*. Established in 1942, *Nutrition Reviews* is highly regarded as the authoritative source of balanced and in-depth coverage of a broad range of topics in the field of human nutrition. A detailed description of the journal and editorial responsibilities can be found at www.ilsi.org. The appointment will begin on January 1, 2009 for an initial term of 3 years.

ILSI is seeking a candidate with a record of recognized scholarship and organizational ability to promote *Nutrition Reviews* as the preeminent review journal in the field. Preference will be given to candidates with broad interdisciplinary knowledge in nutrition and nutrition policy; a strong publication record; direct experience with peer-review policies, procedures, and publications; demonstrable knowledge of information technology trends in scholarly publishing; proven leadership ability; and appropriate time to oversee multiple editorial duties and responsibilities.

Applicants should submit the following materials for consideration: curriculum vitae; letter of interest and qualifications, including applicable editorial and leadership experience; outline of vision for the journal’s conceptual development, including plans for its scientific content as well as its distribution in light of emerging technologies and industry trends.

Applications should be directed electronically to Suzanne Harris, PhD, *Nutrition Reviews* Search Committee, at sharris@ilsi.org. The deadline for submissions is September 15, 2008 or until a suitable candidate is identified. Nominations are also welcome.
Scientists are better than one.

Research Diets, Inc. has established a scientific Resource Center staffed with eight Ph. D. and Masters level scientists with access to over 12,000 original OpenSource Diet™ formulas plus, a database of more than 2,500 journal articles.

Our conversations begin with discussions of animal models being used, desired phenotype and dietary requirements. Next, our scientists will search the published literature to provide you with tools to make an informed decision on diet selection based on solid science. We will then formulate, produce and ship a custom diet in 5 to 7 business days.

Report, Repeat and Revise™

www.ResearchDiets.com

We understand that our customers are the most important part of our business and we take every opportunity to demonstrate total commitment to their needs.”

- Jodi Barb

Our goal is for our customers to see us as part of their team, supplying the quality nutrition that is so vital to their important work. We strive to be the best because that’s what they deserve.
