**Award Announcement**

**The M. L. Sunde Award**

The M.L. Sunde Award recognizes outstanding experimental, applied or fundamental research on avian nutrition.

An award of $2,500 will be presented annually to the first author or authors of an outstanding research paper using an avian species in research published in *The Journal of Nutrition*. Eligible manuscripts will be reviewed by an Award Jury. The selection of the awardee will be based on the long term value of the research to the poultry industry and to mankind.

*The M.L. Sunde Award is made available by the M.L. Sunde Endowment Fund.*

The American Society for Nutrition is pleased to acknowledge the support by these organizations for educational programs of the society.
The Journal of Nutrition (JN) is the premier forum for the publication of peer-reviewed research in all aspects of experimental nutrition. Published since 1928, The Journal of Nutrition is ranked third among peer-reviewed research journals in ISI's nutrition and dietetics category. With an Impact Factor of 3.77 Eigenfactor (www.Eigenfactor.org) ranks JN first for overall journal quality and second for cost-effectiveness. Areas of coverage include:

- Biochemical, Molecular, and Genetic Mechanisms in Nutrition
- Nutrient Physiology, Metabolism, and Nutrient-Nutrient Interactions (including Nutritional Toxicities)
- Nutrition and Disease
- Nutrient Requirements and Optimal Nutrition
- Genomics, Proteomics, and Metabolomics
- Nutritional Epidemiology
- Community and International Nutrition
- Nutritional Immunology
- Ingestive Behavior and Nutritional Neurosciences
- Nutritional Methodologies and Mathematical Modeling

Editor:
A. Catharine Ross,
Pennsylvania State University

Assistant Editor:
Kathryn Harden, University of Illinois,
Urbana-Champaign

Associate Editors:
Laura E. Caulfield, Center for Human Nutrition,
Bloomberg School of Public Health,
The Johns Hopkins University
Teresa A. Davis, Children’s Nutrition Research Center,
Baylor College of Medicine
Jesse Gregory, University of Florida
Xingen Lei, Cornell University
Katherine L. Tucker, Jean Mayer USDA/ 
HNRC on Aging, Tufts University
Malcolm Watford, Rutgers University
Richard J. Wood, Jean Mayer USDA/ 
HNRC on Aging, Tufts University

Monthly, approx. 3100 pages per volume
2009: Volume 139

As seasons change…
so do grain-based lab animal diets.

Grain-based lab animal diets change along with the seasons allowing for variations in the macronutrient content of the ingredients. These changes can lead to variation in the levels of phytoestrogens, heavy metals, and other xenobiotic compounds that ride-along with these ingredients.

Purified-ingredient OpenSource Diet formulas are completely open and change only at the researcher’s request, allowing them to report exactly what their animals are fed, repeat their experiments, and revise dietary components while matching previous diets. Don’t leave your diet formulas to chance – Know what you’re feeding with OpenSource Diets. Contact our Resource Center at info@researchdiets.com to learn more.
Dietary Se requirements based on selenoprotein mRNA level and GPX activity
Severe iron deficiency and bone formation and resorption
Lean body mass and peak bone mineral density in premenopausal women
Hidden fat and passive overconsumption

Supplement:
Infant feeding and the development of obesity
