The Department of Agricultural and Food Sciences (www.agr.ethz.ch) at ETH Zurich invites applications for the position of a professor in Translational Nutrition Biology. The professor will be responsible for developing a leading research and teaching program in translational nutrition biology, using an integrative approach to investigate the complex effects of nutrients on the organism, from the genetic and molecular through the cellular to the systemic levels. Candidates with interest in molecular nutrition are especially encouraged to apply. The professorship’s main research topics may include:

- Nutrient-gene interactions
- Nutrition and metabolomics
- Nutrient neuroendocrine interactions
- Nutrition and health
- Nutritional factors in the development of obesity and its co-morbidities (e.g., type II diabetes and cardiovascular diseases)

The professorship comes with several salary lines for academic and technical assistants, as well as access to excellent experimental animal facilities and to the Functional Genomics Centre of ETH and the University of Zurich. Moreover, the position is expected to be an integral part of the emerging research focus “Food, Nutrition, and Health” at ETH Zurich. The successful candidate will be expected to teach undergraduate level courses (German or English) and graduate level courses (English) covering basic and advanced nutrition physiology.

Please submit your application together with a curriculum vitae and a list of publications and projects to the President of ETH Zurich, Prof. Dr. R. Eichler, ETH Zurich, Raemistrasse 101, 8092 Zurich, Switzerland, no later than March 31, 2009. With a view toward increasing the number of female professors, ETH Zurich specifically encourages qualified female candidates to apply.

Award Announcement

The M. L. Sunde Award

The M. L. Sunde Award recognizes outstanding experimental, applied or fundamental research on avian nutrition.

An award of $2,500 will be presented annually to the first author or authors of an outstanding research paper using an avian species in research published in The Journal of Nutrition. Eligible manuscripts will be reviewed by an Award Jury. The selection of the awardee will be based on the long term value of the research to the poultry industry and to mankind.

The M. L. Sunde Award is made available by the M. L. Sunde Endowment Fund.

The American Society for Nutrition is pleased to acknowledge the support by these organizations for educational programs of the society.
The Journal of Nutrition (JN) is the premier forum for the publication of peer-reviewed research in all aspects of experimental nutrition. Published since 1928, The Journal of Nutrition is ranked third among peer-reviewed research journals in ISI’s nutrition and dietetics category. With an Impact Factor of 3.77, Eigenfactor (www.Eigenfactor.org) ranks JN first for overall journal quality and second for cost-effectiveness. Areas of coverage include:

- Biochemical, Molecular, and Genetic Mechanisms in Nutrition
- Nutrient Physiology, Metabolism, and Nutrient-Nutrient Interactions (including Nutritional Toxicities)
- Nutrition and Disease
- Nutrient Requirements and Optimal Nutrition
- Genomics, Proteomics, and Metabolomics
- Nutritional Epidemiology
- Community and International Nutrition
- Nutritional Immunology
- Ingestive Behavior and Nutritional Neurosciences
- Nutritional Methodologies and Mathematical Modeling

DSM – the Life Sciences and Materials Sciences Company
Royal DSM N.V. creates innovative products and services in Life Sciences and Materials Sciences that contribute to the quality of life. DSM's products and services are used globally in a wide range of markets and applications, supporting a healthier, more sustainable and more enjoyable way of life. End markets include human and animal nutrition and health, personal care, pharmaceuticals, automotive, coatings and paints, electronics and electronics. Life protection and housing. DSM has annual sales of almost EUR 8.8 billion and employs some 23,000 people worldwide.

The scope of the DSM Nutrition Award includes innovative research related to essential nutrients as well as to other naturally occurring bioactive compounds in the field of human nutrition. This can be research of a fundamental nature as well as applied research providing solutions to important research questions in the field of human nutrition. A prime requirement is that the research must have significantly advanced the world's understanding and knowledge of key questions in the field of human nutrition, contributed to general well-being and/or reduced the risk of chronic disease in man.

The award carries a cash prize of EUR 50,000 and is granted every four years.

Candidates for the award can be put forward by nomination only. Each nomination should be accompanied by a one-page summary motivating the nomination, plus a more detailed description of the research accomplishments not exceeding five pages. The nomination should highlight the contribution of the candidate's work to human nutrition, and include a list of the peer-reviewed publications supporting the research plus a maximum of five key papers. A curriculum vitae and supporting letter(s) from recognized scientists in the field are required. Candidates cannot nominate themselves.

An international pre-selection committee will review the nominations and submit a shortlist of the best candidates to an international judging committee, which will select the winner. The award will be presented at the 19th International Congress of Nutrition in Bangkok, Thailand, October 4-9, 2009. The award recipient must be present to accept the award and present a paper on his/her research achievements.

Closing date
April 15, 2009
