CRITICAL REVIEWS

Maternal Micronutrient Deficiency, Fetal Development, and the Risk of Chronic Disease
Parul Christian and Christine P. Stewart 437

Laboratory, Epidemiological, and Human Intervention Studies Show That Tea (Camellia sinensis) May Be Useful in the Prevention of Obesity
Kimberly A. Grove and Joshua D. Lambert 446

BIOCHEMICAL, MOLECULAR, AND GENETIC MECHANISMS

Cholecalciferol Supplementation throughout Winter Does Not Affect Markers of Bone Turnover in Healthy Young and Elderly Adults

Early Weaning Reduces Small Intestinal Alkaline Phosphatase Expression in Pigs
Dale Lackeyram, Chengbo Yang, Tania Archbold, Kendall C. Swanson, and Ming Z. Fan 461

NUTRIENT PHYSIOLOGY, METABOLISM, AND NUTRIENT-NUTRIENT INTERACTIONS

Predicted Apparent Digestion of Energy-Yielding Nutrients Differs between the Upper and Lower Digestive Tracts in Rats and Humans
Leah T. Coles, Paul J. Moughan, Ajay Awati, Alison J. Darragh, and Maggie L. Zou 469

Dietary Phosphate Restriction Decreases Stem Cell Proliferation and Subsequent Growth Potential in Neonatal Pigs
Lindsey S. Alexander, Avanka Mahajan, Jack Odle, Kyle L. Flann, Robert P. Rhoads, and Chad H. Stahl 477

Dietary Supplementation with Lactobacilli and Bifidobacteria Is Well Tolerated and Not Associated with Adverse Events during Late Pregnancy and Early Infancy

Multidrug Resistance Proteins Restrain the Intestinal Absorption of trans-Resveratrol in Rats
M. Emilia Juan, Eulalia González-Pons, and Joana M. Planas 489

Isoleucine Prevents the Accumulation of Tissue Triglycerides and Upregulates the Expression of PPARα and Uncoupling Protein in Diet-Induced Obese Mice
Junko Nishimura, Takayuki Masaki, Mie Arakawa, Masataka Seike, and Hironobu Yoshimatsu 496

Elevated Circulating LDL Phenol Levels in Men Who Consumed Virgin Rather Than Refined Olive Oil Are Associated with Less Oxidation of Plasma LDL
