The Department of Nutrition, at the University of Tennessee, Knoxville, is recruiting for the positions of Assistant and Assistant/Associate Professor (both tenure-track), with a specialty area in nutritional epidemiology or systems-level interventions. Interested applicants should submit letters detailing research and teaching background, curriculum vitae, and names and contact information of four references by October 15, 2010 (at which time the evaluation and review process will begin). The positions will be open until suitable candidates are identified and the positions are filled. For a complete position description and application procedures visit: http://cehhs.utk.edu/news/positions.html, or contact the Search Chair, Katie Kavanagh, at kkavanag@utk.edu, or 865-974-6250. EEO/AA/ADA.

As seasons change... so do grain-based lab animal diets.

Grain-based lab animal diets change along with the seasons allowing for variations in the macronutrient content of the ingredients. These changes can lead to variation in the levels of phytoestrogens, heavy metals, and other xenobiotic compounds that ride-along with these ingredients.

Purified-ingredient OpenSource Diet formulas are completely open and change only at the researcher's request, allowing them to report exactly what their animals are fed, repeat their experiments, and revise dietary components while matching previous diets. Don't leave your diet formulas to chance -- know what you're feeding with OpenSource Diets. Contact our Resource Center at info@researchdiets.com to learn more.
