**Contents**

**Articles**

- **BIOGRAPHY**
  - Biography of Donald Berthold Zilversmit
    André Bensadoun, Malden C. Nesheim, and A. Catharine Ross 211

- **BIOCHEMICAL, MOLECULAR, AND GENETIC MECHANISMS**
  - Prebiotic Fiber Increases Hepatic Acetyl CoA Carboxylase Phosphorylation and Suppresses Glucose-Dependent Insulinotropic Polypeptide Secretion More Effectively When Used with Metformin in Obese Rats
    Kim A. Pyra, Dolan C. Saha, and Raylene A. Reimer 213

  - Oleate Metabolism in Pig Enterocytes Is Characterized by an Increased Oxidation Rate in the Presence of a High Esterification Rate within Two Days after Birth
    Claire Cherbuy, Philippe Guesnet, Marie-Thérèse Morel, Claude Kohl, Muriel Thomas, Pierre-Henri Duée, and Carina Prip-Buus 221

  - Triglyceride-Rich Lipoprotein Regulates APOB48 Receptor Gene Expression in Human THP-1 Monocytes and Macrophages
    Beatriz Bermudez, Sergio Lopez, Lourdes M. Varela, Almudena Ortega, Yolanda M. Pacheco, Wenceslao Moreda, Rafael Moreno-Luna, Rocío Abia, and Francisco J. G. Muriana 227

- **NUTRIENT PHYSIOLOGY, METABOLISM, AND NUTRIENT-NUTRIENT INTERACTIONS**
  - Administration of High Doses of Copper to Capuchin Monkeys Does Not Cause Liver Damage but Induces Transcriptional Activation of Hepatic Proliferative Responses
    Magdalena Araya, Héctor Núñez, Leonardo Pavez, Miguel Arredondo, Marco Méndez, Felipe Cisternas, Fernando Pizarro, Walter Sierralta, Ricardo Uauy, and Mauricio González 233

  - Quantifying Resistant Starch Using Novel, In Vivo Methodology and the Energetic Utilization of Fermented Starch in Pigs
    Walter J. J. Gerrits, Marlo W. Bosch, and Joost J. G. C. van den Borne 238

  - Validation of an In Vitro Digestive System for Studying Macronutrient Decomposition in Humans
    Katrin A. Kopf-Bolanz, Flurina Schwander, Martin Gijs, Guy Vergères, Reto Portmann, and Lotti Egger 245

  - Greater Fructose Consumption Is Associated with Cardiometabolic Risk Markers and Visceral Adiposity in Adolescents
    Norman K. Pollock, Vanessa Bundy, William Kanto, Catherine L. Davis, Paul J. Bernard, Haidong Zhu, Bernard Gutin, and Yanbin Dong 251

  - The Glycemic Response Does Not Reflect the In Vivo Starch Digestibility of Fiber-Rich Wheat Products in Healthy Men
    Coby Eelderink, Tanja C. W. Moerdijk-Poortvliet, Hongwei Wang, Marianne Scheipers, Tom Preston, Theo Boer, Roel J. Vonk, Henk Schierbeek, and Marion G. Priebe 258
Dietary Plasma Proteins Modulate the Adaptive Immune Response in Mice with Acute Lung Inflammation
Mónica Maijó, Lluísà Miró, Javier Polo, Joy Campbell, Louis Russell, Joe Crenshaw, Eric Weaver, Miquel Moretó, and Anna Pérez-Bosque

Iron Depletion and Repletion with Ferrous Sulfate or Electrolytic Iron Modifies the Composition and Metabolic Activity of the Gut Microbiota in Rats
Alexandra Dostal, Christophe Chassard, Florentine M. Hilty, Michael B. Zimmermann, Tanja Jaeggi, Samuela Rossi, and Christophe Lacroix

Carbohydrate Intake Modulates the Effect of the ABCA1-R230C Variant on HDL Cholesterol Concentrations in Premenopausal Women
Sandra Romero-Hidalgo, Teresa Villarreal-Molina, Juan A. González-Barrios, Samuel Canizales-Quinteros, Martha E. Rodríguez-Arellano, Lucia B. Yañez-Velazco, Demetrio A. Bernal-Alcantara, Antonio R. Villa, Barbara Antuna-Puente, Víctor Acuña-Alonzo, José L. Merino-García, Hayde N. Moreno-Sandoval, and Alessandra Carnevale

Dietary Patterns Are Associated with Disease Risk among Participants in the Women’s Health Initiative Observational Study
Linda VanHorn, Lu Tian, Marian L. Neuhausser, Barbara V. Howard, Charles B. Eaton, Linda Snetselaar, Niru R. Matthan, and Alice H. Lichtenstein

Erythrocyte Copper Chaperone for Superoxide Dismutase Is Increased following Marginal Copper Deficiency in Adult and Postweanling Mice
Katie C. Lassi and Joseph R. Prohaska

Generation and Acculturation Status Are Associated with Dietary Intake and Body Weight in Mexican American Adolescents
Ji-Hong Liu, Yong H. Chu, Edward A. Frongillo, and Janice C. Probst

Factors Associated with Sugar-Sweetened Beverage Intake among United States High School Students
Sohyun Park, Heidi M. Blanck, Bettylou Sherry, Nancy Brener, and Terrence O’Toole

Long-Term Dietary Potential Renal Acid Load During Adolescence Is Prospectively Associated with Indices of Nonalcoholic Fatty Liver Disease in Young Women
Danika Krupp, Simone A. Johner, Hermann Kalhoff, Anette E. Buyken, and Thomas Remer

Diet Quality Is Associated with All-Cause Mortality in Adults Aged 65 Years and Older
Sarah A. McNaughton, Chris J. Bates, and Gita D. Mishra

Longitudinal Changes in BMI in Older Adults Are Associated with Meat Consumption Differentially, by Type of Meat Consumed
Anne M. J. Gilsing, Matty P. Weijenberg, Laura A. E. Hughes, Ton Ambergen, Pieter C. Dagnelie, R. Alexandra Goldbohm, Piet A. van den Brandt, and Leo J. Schouten

Iron Deficiency and Anemia Predict Mortality in Patients with Tuberculosis
Sheila Isanaka, Ferdinand Mugusi, Willy Urassa, Walter C. Willett, Ronald J. Bosch, Eduardo Villamor, Donna Spiegelman, Christopher Duggan, and Wafaie W. Favzi

Moderate to Severe, but Not Mild, Maternal Anemia Is Associated with Increased Risk of Small-for-Gestational-Age Outcomes
Naoko Kozuki, Anne C. Lee, and Joanne Katz
Soy-Derived Di- and Tripeptides Alleviate Colon and Ileum Inflammation in Pigs with Dextran Sodium Sulfate-Induced Colitis
Denise Young, Masahisa Ibuki, Toshihiro Nakamori, Ming Fan, and Yoshinori Mine 363

A Low-Glycemic Load Diet Reduces Serum C-Reactive Protein and Modestly Increases Adiponectin in Overweight and Obese Adults
Marian L. Neuhouser, Yvonne Schwarz, Chiachi Wang, Kara Breymeyer, Gloria Coronado, Chin-Yun Wang, Karen Noar, Xiaoling Song, and Johanna W. Lampe 369

Lactobacillus rhamnosus GG and Bifidobacterium animalis MB5 Induce Intestinal but Not Systemic Antigen-Specific Hyporesponsiveness in Ovalbumin-Immunized Rats
Alberto Finamore, Marianna Roselli, Maria Serena Britti, Nicolò Merendino, and Elena Mengheri 375

Mild Dehydration Affects Mood in Healthy Young Women

Estimation of the 5-Methyltetrahydrofolate Apparent Volume of Distribution in Humans
Maria J. King, Eid I. Brima, Jack R. Dainty, David A. Barrett, Anthony J. Wright, Gavin Willis, and Paul M. Finglas 389

Cover image: Food models play an important role in food selection at restaurants and take-out counters and are widely used in nutrition research to estimate portion size. Asian countries have typically led the way in creating detailed and highly realistic models, as illustrated here by a selection on display in Omiya, Japan. Photo courtesy of Alex Ross.
