BIOCHEMICAL, MOLECULAR, AND GENETIC MECHANISMS

Supplemental Dietary Folic Acid Has No Effect on Chromosome Damage in Erythrocyte Progenitor Cells of Mice
Breanne G. Swayne, Nathalie A. Behan, Andrew Williams, Patrick J. Stover, Carole L. Yauk, and Amanda J. MacFarlane

A γ-Tocopherol-Rich Mixture of Tocopherols Maintains Nrf2 Expression in Prostate Tumors of TRAMP Mice via Epigenetic Inhibition of CpG Methylation
Ying Huang, Tin Oo Khor, Limin Shu, Constance Lay-Lay Saw, Tien-Yuan Wu, Nanjoo Suh, Chung S. Yang, and Ah-Ng Tony Kong

High Dietary Saturated Fat Intake Accentuates Obesity Risk Associated with the Fat Mass and Obesity–Associated Gene in Adults
Catherine M. Phillips, Emmanuelle Kesse-Guyot, Ross McManus, Serge Hercberg, Denis Lairon, Richard Pellanis, and Helen M. Roche

NUTRIENT PHYSIOLOGY, METABOLISM, AND NUTRIENT-NUTRIENT INTERACTIONS

Resistant Starches Protect against Colonic DNA Damage and Alter Microbiota and Gene Expression in Rats Fed a Western Diet

Deuterium-Labeled Phyloquinone Has Tissue-Specific Conversion to Menaquinone-4 among Fischer 344 Male Rats
Ala Al Rajabi, Sarah L. Booth, James W. Peterson, Sang Woon Choi, John W. Suttie, M. Kyla Shea, Benchun Miao, Michael A. Grusak, and Xueyan Fu

Multiple Micronutrient-Fortified Rice Affects Physical Performance and Plasma Vitamin B-12 and Homocysteine Concentrations of Indian School Children
Prashanth Thankachan, Jee Hyun Rah, Tinku Thomas, Sumithra Selvam, Vani Amalrajan, Krishnamachari Srinivasan, Georg Steiger, and Anura V. Kurpad

High Endogenous Salivary Amylase Activity Is Associated with Improved Glycemic Homeostasis following Starch Ingestion in Adults
Abigail L. Mandel and Paul A. S. Breslin

Dietary Cholecalciferol and Calcium Levels in a Western-Style Defined Rodent Diet Alter Energy Metabolism and Inflammatory Responses in Mice
Claire C. Bastie, Erin Gaffney-Stomberg, Ting-Wen A. Lee, Elena Dhim, Jeffrey E. Pessin, and Leonard H. Augenlicht
Genome-Wide Association Study Identifies Three Common Variants Associated with Serologic Response to Vitamin E Supplementation in Men
Jacqueline M. Major, Kai Yu, Charles C. Chung, Stephanie J. Weinstein, Meredith Yeager, William Wheeler, Kirk Snyder, Margaret E. Wright, Jarmo Virtamo, Stephen Chanock, and Demetrius Albanes

Alkylresorcinol Metabolite Concentrations in Spot Urine Samples Correlated with Whole Grain and Cereal Fiber Intake but Showed Low to Modest Reproducibility over One to Three Years in U.S. Women
Rikard Landberg, Mary K. Townsend, Nithya Neelakantan, Qi Sun, Laura Sampson, Donna Spiegelman, and Rob M. van Dam

Central Adiposity and Protein Intake Are Associated with Arterial Stiffness in Overweight Children
Karina Arnberg, Anni Larnkjær, Kim F. Michaelsen, and Christian Mølgaard

Estimation of Trends in Serum and RBC Folate in the U.S. Population from Pre- to Postfortification Using Assay-Adjusted Data from the NHANES 1988–2010
Christine M. Pfeiffer, Jeffery P. Hughes, Ramon A. Durazo-Arvizu, David A. Lacher, Christopher T. Sempos, and Clifford L. Johnson

Changes in Measurement Procedure from a Radioassay to a Microbiologic Assay Necessitate Adjustment of Serum and RBC Folate Concentrations in the U.S. Population from the NHANES 1988–2010
Christine M. Pfeiffer, Jeffery P. Hughes, Christopher T. Sempos, Mindy Zhang, Elizabeth A. Yetley, and Clifford L. Johnson

An Index Measuring Adherence to Complementary Feeding Guidelines Has Convergent Validity as a Measure of Infant Diet Quality
Rebecca K. Golley, Lisa G. Smithers, Murthy N. Mittinty, Laima Brazionis, Pauline Emmett, Kate Northstone, Karen Campbell, Sarah A. McNaughton, and John W. Lynch

A Healthy Dietary Pattern at Midlife Is Associated with Subsequent Cognitive Performance
Emmanuelle Kesse-Guyot, Valentina A. Andreeva, Claude Jeandel, Monique Ferry, Serge Hercberg, and Pilar Galan

The Effects of Fructose Intake on Serum Uric Acid Vary among Controlled Dietary Trials
