Announcement

Interest in History of Nutrition manuscripts

The Journal of Nutrition welcomes the submission of manuscripts concerning topics of historical interest that are relevant to the nutrition of humans and other species. Manuscripts that conform to The Journal of Nutrition guidelines for manuscripts will be submitted for regular peer review. Please see the instructions to authors. Authors who may be interested in submitting may submit an outline to the Editor for consideration.

Please send inquiries to the Journal’s Editor for History and Biography, Harold H. Sandstead, MD, hsandste@utmb.edu.

IOWA STATE UNIVERSITY
Department of Food Science and Human Nutrition

The Department of Food Science and Human Nutrition at Iowa State University located in Ames, Iowa, seeks applications for a 9-month, tenure-track faculty position in human nutrition at the Assistant, Associate or Full Professor level. The successful candidate is expected to have a focus on research and establish a productive program with strong extramural support. Candidates are sought with expertise in collaborative global research related to nutrition in low income countries with a focus on maternal and child health. For information about the department, please visit our website at http://www.fshn.hs.iastate.edu/.

Required Qualifications: Earned doctorate in Nutritional Sciences or closely related field, evidence of research productivity related to nutrition in low income countries, and ability to teach nutrition courses at the undergraduate and graduate levels.

In addition to the above qualifications, for consideration at the Associate or Full Professor level, applicants must meet the university standards for appointment to the rank.

Preferred Qualifications: Demonstrated ability in teaching, student mentoring, and multidisciplinary research.

Salary/Wage: Commensurate with training and experience.

Application Instructions: Only online applications will be considered. To apply, go to www.iastatejobs.com/applicants/Central?quickFind=81587 Vacancy ID 120357. To guarantee consideration, application must be received by August 1, 2012 or until position is filled.

The Department of Food and Bioproduct Sciences in the College of Agriculture and Bioresources invites applications from individuals qualified to develop an active research program in nutritional genomics. Appropriate areas of investigation would include: molecular mechanisms of the effects of nutraceuticals and functional foods on human health; functional analysis of bioactive compounds and natural products at the genomic level; and applications of functional genomics in improving the nutritional value of food.

The successful candidate will have a PhD (obtained within the last ten years), acknowledged by their peers as having the potential to lead in their field, and have experience in developing interdisciplinary research partnerships. NSERC Tier II Canada Research Chairs are expected to mount an independent, externally funded research program and to participate in teaching at the undergraduate and graduate levels, complement existing departmental expertise in functional and molecular genomics and have opportunities for collaboration within and beyond the department. Work in this area should lead to the development of new foods for optimum health and longevity and new opportunities for Canada’s agri-food sector.

Single file, electronic applications including a CV, a concise teaching and research vision statement, and contact information for three referees can be sent to Dr. Phyllis Shand, Head, Department of Food and Bioproduct Sciences, University of Saskatchewan, 51 Campus Drive, Saskatoon, SK, Canada S7N 5A8 Email: phyllis.shand@usask.ca. For additional information about the posting and the University, please visit http://www.usask.ca/hrd/work/index.php and our Department website at: http://agbio.usask.ca/fabs.
