Ensuring the High Quality of Journal of Nutrition Publications
A. Catharine Ross 1365

NUTRIENT PHYSIOLOGY, METABOLISM, AND NUTRIENT-NUTRIENT INTERACTIONS

Hydrolyzed Casein Reduces Diet-Induced Obesity in Male C57BL/6J Mice
Haldis H. Lillefosse, Hanne Serup Tastesen, Zhen-Yu Du, Ditte B. Ditlev, Frits A. Thorsen, Lise Madsen, Karsten Kristiansen, and Bjørn Liaset 1367

Total Iron Absorption by Young Women from Iron-Biofortified Pearl Millet Composite Meals Is Double That from Regular Millet Meals but Less Than That from Post-Harvest Iron-Fortified Millet Meals
Colin I. Cercamondi, Ines M. Egli, Evariste Mitchikpe, Felicien Tossou, Christophe Zeder, Joseph D. Hounhouigan, and Richard F. Hurrell 1376

NUTRITION AND DISEASE

Plasma Alkylresorcinols Reflect Important Whole-Grain Components of a Healthy Nordic Diet

Very High Fructose Intake Increases Serum LDL-Cholesterol and Total Cholesterol: A Meta-Analysis of Controlled Feeding Trials
Yu Hui Zhang, Tao An, Rong Cheng Zhang, Qiong Zhou, Yan Huang, and Jian Zhang 1391

Acute Ingestion of Beetroot Bread Increases Endothelium-Independent Vasodilation and Lowers Diastolic Blood Pressure in Healthy Men: A Randomized Controlled Trial
Ditte A. Hobbs, Marie G. Goulding, Annie Nguyen, Thomas Malaver, Claire F. Walker, Trevor W. George, Lisa Methven, and Julie A. Lovegrove 1399

A High-Salt Diet Further Impairs Age-Associated Declines in Cognitive, Behavioral, and Cardiovascular Functions in Male Fischer Brown Norway Rats
Gaurav Chugh, Mohammad Asghar, Gaurav Patki, Ritu Bohat, Faizan Jafri, Farida Allam, An T. Dao, Christopher Mowrey, Karim Alkadhi, and Samina Salim 1406

Concurrent Physical Activity Modifies the Association between n3 Long-Chain Fatty Acids and Cardiometabolic Risk in Midlife Adults
Matthew F. Muldoon, Kirk I. Erickson, Bret H. Goodpaster, John M. Jakicic, Sarah M. Conklin, Akira Sekikawa, Jeffrey K. Yao, and Stephen B. Manuck 1414
Dietary Linoleic Acid and α-Linolenic Acid Differentially Affect Renal Oxylipins and Phospholipid Fatty Acids in Diet-Induced Obese Rats
Stephanie P. B. Caligiuri, Karin Love, Tanja Winter, Joy Gauthier, Carla G. Taylor, Tom Blydt-Hansen, Peter Zahradka, and Harold M. Aukema

Vitamin D Supplementation Affects Serum High-Sensitivity C-Reactive Protein, Insulin Resistance, and Biomarkers of Oxidative Stress in Pregnant Women
Zatollah Asemi, Mansooreh Samimi, Zohreh Tabassi, Hossein Shakeri, and Ahmad Esmailzadeh

Higher Vitamin D Intake in Preterm Infants Fed an Isocaloric, Protein- and Mineral-Enriched Postdischarge Formula Is Associated with Increased Bone Accretion
Monique van de Lagemaat, Joost Rotteveel, Anne Schaafsma, Mirjam M. van Weissenbruch, and Harrie N. Lafeber

Higher Concentrations of a Urinary Biomarker of Polyphenol Intake Are Associated with Decreased Mortality in Older Adults
Raul Zamora-Ros, Montserrat Rabassa, Antonio Cherubini, Mireia Urpi-Sardà, Stefania Bandinelli, Luigi Ferrucci, and Cristina Andres-Lacueva

Adherence to Dietary Recommendations Is Associated with Acculturation among Latino Farm Workers
Susana L. Matias, Maria T. Stoecklin-Marois, Daniel J. Tancredi, and Marc B. Schenker

Elevated Plasma Ferritin Is Associated with Increased Incidence of Type 2 Diabetes in Middle-Aged and Elderly Chinese Adults
Liang Sun, Geng Zong, An Pan, Xingwang Ye, Huaxing Li, Zhijie Yu, Yao Zhao, Shurong Zou, Danxia Yu, Qianlu Jin, Frank B. Hu, and Xu Lin

Plant and Animal Protein Intakes Are Differently Associated with Nutrient Adequacy of the Diet of French Adults
Géraldine M. Camilleri, Eric O. Verger, Jean-François Huneau, Florence Carpentier, Carine Dubuisson, and François Mariotti

Higher Dietary Flavonol Intake Is Associated with Lower Incidence of Type 2 Diabetes
Paul F. Jacques, Aedin Cassidy, Gail Rogers, Julia J. Peterson, James B. Meigs, and Johanna T. Dwyer

The Dietary n6:n3 Fatty Acid Ratio during Pregnancy Is Inversely Associated with Child Neurodevelopment in the EDEN Mother-Child Cohort
Jonathan Y. Bernard, Maria De Agostini, Anne Forhan, Blandine de Lauzon-Guillain, Marie-Aline Charles, Barbara Heude, and the EDEN Mother-Child Cohort Study Group

Biofortification of Pearl Millet with Iron and Zinc in a Randomized Controlled Trial Increases Absorption of These Minerals above Physiologic Requirements in Young Children
Bhalchandra S. Kodkany, Roopa M. Bellad, Niranjana S. Mahantshetti, Jamie E. Westcott, Nancy F. Krebs, Jennifer F. Kemp, and K. Michael Hambidge

A Food Store–Based Environmental Intervention Is Associated with Reduced BMI and Improved Psychosocial Factors and Food-Related Behaviors on the Navajo Nation
Joel Gittelsohn, Elizabeth M. Kim, Siran He, and Marla Pardilla

n3 PUFAs Reduce Mouse CD4⁺ T-Cell Ex Vivo Polarization into Th17 Cells
Jennifer M. Monk, Tim Y. Hou, Harmony F. Turk, David N. McMurray, and Robert S. Chapkin
A Mathematical Model of Tryptophan Metabolism via the Kynurenine Pathway Provides Insights into the Effects of Vitamin B-6 Deficiency, Tryptophan Loading, and Induction of Tryptophan 2,3-Dioxygenase on Tryptophan Metabolites

Luisa Rios-Avila, H. Frederik Nijhout, Michael C. Reed, Harry S. Sitren, and Jesse F. Gregory III

Where Is the Missing 40 μg/d of Vitamin D?
John J. Cannell

Reply to Cannell
Robert P. Heaney

Do Whole Grain Cereals Really Reduce LDL-Cholesterol by 0.72 mmol/L?
Thomas M.S. Wolever

Reply to Wolever
Sara A. Chacko, Yilin Chen, and Simin Liu
