Convening Health Professionals and Researchers around Today’s Hot Topics in Food, Nutrition and Health

Lectures • Controversy Sessions • Workshops • Professional Development • Scientific Posters • Networking • Exhibits

THEMATIC PROGRAM AREAS
★ Advances that could impact the 2015 Dietary Guidelines for Americans—from sodium and health outcomes to the skinny on dietary fats
★ Nutritional conditions over the lifespan—from pediatrics to the elderly
★ The role of the microbiome in health and disease
★ Best practices of inter-professional approaches to nutrition care

PROGRAM COMMITTEE
Brian Tobin, PhD, Co-Chair
Edward Saltzman, MD, Co-Chair
Leticia Castillo, MD
Roger Clemens, Dr PH
David Heber, MD, PhD
Mary Ann Johnson, PhD, RD
Penny Kris-Etherton, PhD, RD
Xiang-Dong Wang, MD, PhD
William Wong, PhD

ADVANCES & CONTROVERSIES in CLINICAL NUTRITION
December 5-7, 2013
Capital Hilton, 1001 16th St. NW, Washington, DC

Need to promote open positions, fellowship opportunities, programs, or conferences in this journal?

The American Society for Nutrition (ASN) offers advertising opportunities in the following publications:

• The Journal of Nutrition (JN)
• The American Journal of Clinical Nutrition (AJCN)
• Advances in Nutrition

• ASN Member e-Newsletter
• Medical Nutrition Highlights
• Medical Nutrition News

Reach your target audience!

The ASN award winning publications are a perfect way to reach research scientists, physicians, and registered dieticians in any area of nutrition. Recruitment and product advertising are accepted for print, online, and email advertising.

Visit www.nutrition.org/publications/advertising/ for current rates and advertising opportunities, or contact Valerie Marvin at 201-767-4170.
Good mornings begin here.

A cereal breakfast. Why it’s one of the best ways to start the day.

Lower BMI

< BMI
Research shows that people who start their day with a cereal breakfast tend to have lower BMIs than those who eat other breakfasts—or skip the meal entirely.4

Increased Fiber

9 out of 10
9 out of 10 people don’t get enough fiber. Fortunately, Kellogg offers more cereals that are a good source of fiber (3 grams) and contain half a serving of whole grains (8 grams) than any other U.S. food company.3

Affordable

50¢
A smart economic choice, a single serving of Kellogg cereal and milk costs about fifty cents.

More Nutrients

P+4
A serving of Kellogg cereals and a cup of milk can provide protein and four nutrients most people don’t get enough of: fiber, calcium, Vitamin D and potassium.

Sugar

4%
Less than you might think—Cereal contributes less than four percent of daily added sugar intake in the U.S. diet.2

Sugar

150 Calories

150
A serving of cereal and skim milk contains about 150 calories—it’s a low-fat, low-cholesterol way to start the day right.4
