Tate & Lyle
Unilever North America

Ideas for ASN’s Sustaining Partners?
The Sustaining Partners are represented in the Society by a Sustaining Partner Roundtable. The members of this roundtable help to provide visibility within ASN to matters of interest to industry.

Interested in Adding Your Support to the Society? Your unrestricted contribution is used to support programs and awards that help the association fulfill its mission: to be the leading nutrition research society dedicated to improving the health of individuals and populations worldwide.

FIRST TO PUBLISH. FIRST TO PRINT.

The first scientific journal dedicated to nutrition research, The Journal of Nutrition (JN) is still the quickest to publish original studies about all aspects of human and animal nutrition. Highly cited and recommended, JN articles are trusted by researchers, government leaders, and health professionals who require the very latest data to make the most informed health-related decisions and policies. JN’s impact is truly as deep as its appeal is broad.

Making a difference. Findings published in JN regularly provide vital supporting evidence for guidelines, reports, and recommendations issued by governments, foundations, and professional organizations. For example, information in JN underpins

- the new US Department of Agriculture’s Dietary Guidelines for Americans.
- World Health Organization (WHO) recommendations in the areas of chronic diseases, child health, HIV/AIDS, women’s health, and more.
- UNICEF reports on global efforts to eliminate malnutrition and nutrient deficiencies.
- Pan American Health Organization reports on pressing health issues.
- systematic reviews of healthcare and health policy of The Cochrane Collaboration.
- position and consensus statements of professional and scientific societies such as the Academy of Nutrition and Dietetics; NAASO, The Obesity Society, and the American Diabetes Association.

Cited and recommended. JN articles are among the most frequently cited, most highly recommended materials in the nutrition and dietetics community and in the healthcare profession.

- More than 8% of all citations to journals in the nutrition and dietetics category tracked by the JCR were in JN—more than 35,000 in 2015 alone.
