CONTENTS

No. 1 JANUARY 1953

Clive M. McCay. Biography of Gustav B. von Bunge with frontispiece ....... 3

Luther R. Richardson, Lynn C. Blaylock and Carl M. Lyman. Influence of the level of vitamins in the diet on the concentration of free amino acids in the plasma of chicks ........................................... 21

Amos E. Light and John A. Tornabene. Effects of prolonged percutaneous administration of methyl testosterone and estradiol on growing male rats. Ten figures ....................................................... 51

O. Neal Miller, J. W. Goddard, Robert E. Olson and F. J. Stare. Folic acid deficiency in the duck. Ten figures ................................................................. 65

Hideo Nishimura. Zinc deficiency in suckling mice deprived of colostrum. Eleven figures ................................................................. 79

Charles D. May, Agnes Hamilton and Charles T. Stewart. Experimental megaloblastic anemia and scurvy in the monkey. V. Nature of the relation of ascorbic acid deficiency to the metabolism of folic acid compounds. One figure ....................................................... 121

K. R. Johansson, G. E. Peterson and Elliot C. Dick. Effects of dietary aureomycin upon the intestinal microflora and the intestinal synthesis of vitamin B12 in the rat. Four figures ....................................................... 135

F. W. Sherwood and Virginia Weldon. Comparison of four feeding methods for assessing the relative growth-promoting properties of proteins ......... 153

Arleen P. Martin, Charles R. Shaw and Harold H. Williams. Growth response of the rat to heterologous protein administered intraperitoneally. One figure ....................................................... 163

G. P. Lofgreen and Max Kleiber. The metabolic fecal nitrogen excretion of the young calf and the true digestibility of casein. One figure ............. 183
D. M. Hegsted. Protein, calorie and methionine intakes in relation to nitrogen balance. (A note on the paper by Mertz et al.) 191

Robert H. Udall and Clive M. McCay. The feed value of fresh bone 197

A. A. Kandutsch and C. A. Baumann. Factors affecting the stability of thiamine in a typical laboratory diet. One figure 209

A. E. Denton and C. A. Elvehjem. Enzymatic liberation of amino acids from different proteins 221

M. O. Schultze. Nutritional value of plant materials. VIII. Lactation failure of rats fed diets containing purified soybean proteins. One figure 231

M. O. Schultze. Nutritional value of plant materials. IX. The effect of various supplements on lactation failure of rats fed diets containing purified soybean proteins 245

A. E. Harper and M. C. Kayatama. The influence of various carbohydrates on the utilization of low protein rations by the white rat. I. Comparison of sucrose and cornstarch in 9% casein rations 261

B. S. Schweigert and Barbara T. Guthneck. Utilization of amino acids from foods by the rat. I. Methods of testing for lysine. One figure 277

Barbara T. Guthneck, Barbara A. Bennett and B. S. Schweigert. Utilization of amino acids from foods by the rat. II. Lysine 289

John Hald, Winfrey Wynn, James H. Shaw and Reidar F. Sognnaes. The relative cariogenicity of sucrose when ingested in the solid form and in solution by the albino rat 295

J. F. Elam, R. L. Jacobs, W. L. Tidwell, L. L. Gee and J. R. Couch. Possible mechanism involved in the growth-promoting responses obtained from antibiotics 307

Paul F. Fenton and Marian T. Dowling. Studies on obesity. I. Nutritional obesity in mice. Three figures 319

E. W. Crampton, R. H. Common, Florence A. Farmer, A. F. Wells and Donna Crawford. Studies to determine the nature of the damage to the nutritive value of some vegetable oils from heat treatment. III. The segregation of toxic and non-toxic material from the esters of heat-polymerised linseed oil by distillation and by urea adduct formation. One figure 333

Albert N. Booth, Robert H. Wilson and Floyd DeEds. Effects of prolonged ingestion of xylose on rats 347

Patricia T. McCarthy and Leopold R. Cerecedo. The vitamin A requirement of the mouse. One figure 357

The American Institute of Nutrition. The registry of nutritional pathology 369

No. 3 MARCH 1953

Benjamin H. Erskoff. Comparative effects of pantothenic acid deficiency and inanition on resistance to cold stress in the rat 373

Morton A. Schwartz and J. N. Williams, Jr. Effect of vitamins and natural products on liver ascorbic acid of sulfasuxidine-fed rats 387
CONTENTS

THEODORE C. PANOS AND JOHN C. FINERTY. Effects of a fat-free diet on growing female rats, with special reference to the endocrine system. Eleven figures .................................................. 397

DAVID R. WEIR. Leukocyte production in pantothenic acid-deficient mice. Four figures ..................................................... 425

R. F. SEWELL, J. K. LOOISI, L. A. MAYNARD, HAROLD H. WILLIAMS AND BEN E. SHEFFY. The quantitative threonine requirement of the suckling pig. One figure .................................................. 435

DIETER KOCH-WESER, J. DE LA HUERA AND HANS POPPER. Effect of choline supplements on fatty metamorphosis and liver cell damage in choline and protein deficiency. Two figures ................... 443

R. G. HANSEN, H. M. SCOTT, B. L. LARSON, T. S. NELSON AND P. KRICHENKY. Growth stimulation and growth inhibition of chicks fed forage and forage juice concentrate .................................................. 453

W. W. WAINIO, BERTRAM EICHEL, HERBERT J. EICHEL, P. PERSON, FRANCES L. ESTES AND J. B. ALLISON. Oxidative enzymes of the liver in protein depletion. Eight figures ........................................ 465

R. A. COLLINS, M. SCHREIBER, C. A. ELVEHJEM AND E. B. HART. Vitamin B\textsubscript{m} and folic acid in milk diets .................................................. 485

EDGAR A. HAWK AND C. A. ELVEHJEM. The effects of vitamin B\textsubscript{m} and B\textsubscript{m\textprime} on growth, kidney hemorrhage, and liver fat in rats fed purified diets ............ 495

R. BRAUDE AND B. CONNER JOHNSON. Effect of aureomycin on nitrogen and water metabolism in growing pigs .................................................. 505

MADELYN WOMACK, HARRIET A. HARLIN AND PEI-HSING LIN. The influence of the non-essential amino acids on the requirement of the adult rat for isoleucine, methionine and threonine .................................. 513

IRVIN E. LIENER. Soyin, a toxic protein from the soybean. I. Inhibition of rat growth .................................................. 527

W. L. LEOSCHKE, R. J. LALOR AND C. A. ELVEHJEM. The vitamin B\textsubscript{2} requirement of mink. Two figures .................................................. 541

No. 4 APRIL 1953

LAWRENCE J. SCHROEDER, MICHAEL IACOBKLLIS AND ARTHUR H. SMITH. Heat processing and the nutritive value of milk and milk products. Five figures 549

BACON F. CHOW, J. M. BURNETT, C. T. LING AND L. BARROWS. Effects of basal diets on the response of rats to certain dietary non-ionic surface-active agents 563

GERALD LITWACK, J. N. WILLIAMS, JR., PREMA FATTERPAKER, LILLIAN CHEN AND C. A. ELVEHJEM. Further studies relating liver xanthine oxidase to quality of dietary protein ........................................ 579

R. A. COLLINS, M. SCHREIBER AND C. A. ELVEHJEM. The influence of relative humidity upon vitamin deficiencies in rats. One figure .................................................. 589

BRUCE KENNELLY AND LEONARD A. MAYNARD. The interrelationship between thyroid activity, dietary fat and lipogenesis .................................................. 599
IRVIN E. LIENER AND ELDON G. HILL. The effect of heat treatment on the nutritive value and hemagglutinating activity of soybean oil meal. One figure .......................... 609

LOUIS J. PECORA. Effect of antibiotics on rats fed amino acid-supplemented rice diets ........................................ 621

ROMAN KULWICH, LEE STRUGLIA AND P. B. PEARSON. The effect of coprophagy on the excretion of B vitamins by the rabbit .................. 639

J. GUZMAN-GARCIA, W. R. SARLES AND C. A. BAUMANN. Microorganisms in the intestines of rats fed penicillin ........................................ 647

BACON F. CHOW, ROBERT L. DAVIS AND SHANLEY DAVIS. The effect of antibiotics and the composition of diets on fecal vitamin B₁₂ and biotin .................. 657

ROBERT A. HARTZ, BACON F. CHOW AND LOIS BARROWS. Storage and elimination of vitamin B₁₂ in the rat. One figure ........................................ 669

CARL M. LYMAN, WAN YUIN CHANG AND J. R. COUCH. Evaluation of protein quality in cottonseed meals by chick growth and by a chemical index method ........................................ 679
