CONTENTS

No. 1 SEPTEMBER 1953

C. A. ELVEHJEM. Biography of Edwin Bret Hart, with frontispiece ............... 3

L. A. MAYNARD. Total digestible nutrients as a measure of feed energy. Editorial Review .................................................. 15

CALVIN W. WOODRUFF, SAM L. CLARK, JR., AND EDWIN B. BRIDGEFORTH. Folic acid deficiency in the guinea pig ........................................... 23

W. A. HARDISON AND J. T. REID. Use of indicators in the measurement of the dry matter intake of grazing animals. Two figures ................. 35

R. L. ATKINSON, B. L. REID, J. H. QUINNBERY AND J. R. COUCH. Antibiotics, methionine and unidentified growth factors in the nutrition of Broad-breasted Bronze turkey poults ........................................... 53

JOHN B. LYON, JR., MARIAN T. DOWLING AND PAUL F. FENTON. Studies on obesity. II. Food intake and oxygen consumption ......................... 65

MARJORIE M. NELSON AND HERBERT M. EVANS. Relation of dietary protein levels to reproduction in the rat ................................................... 71

W. W. WESTERFELD AND DAN A. RICHERT. Distribution of the xanthine oxidase factor (molybdenum) in foods. One figure ......................... 85

WILLIAM H. JAMES AND ISRAEL M. ELGINDI. The utilization of carotene. I. As affected by certain proteins in the diet of growing albino rats ........................................... 97

H. D. JACKSON, E. T. MERTZ AND W. M. BEESON. Quantitative valine requirement of the weanling pig .................................................. 109

MADELYN WOMACK, MARY W. MARSHALL AND ALBERT B. PARKS. Some factors affecting nitrogen balance in the adult rat .............................. 117

CATHARINE HENDRICK, HARLAN L. KLUO AND OSCAR E. OLSON. Effect of 3-nitro, 4-hydroxyphenylarsonic acid and arsanilic acid on selenium poisoning in the rat ........................................... 131

AMERICAN INSTITUTE OF NUTRITION. Proceedings of the seventeenth annual meeting. Chicago, Illinois, April 6-10, 1953 ........................................... 139

No. 2 OCTOBER 1953

JOHN R. MURLIM, ALASTAIR D. HAYES AND KARL JOHNSON WITH THE TECHNICAL ASSISTANCE OF HELEN COATES AND MICHAEL LATZGOLA. Correlation between the biological value of protein and the percentage of creatinine N in the urine. Three figures ........................................... 149

CHARLES O. MILLER, N. R. ELLIS, J. W. STEVENSON AND ROBERT DAVEY. The riboflavin requirement of swine for reproduction ......................... 163
G. E. Peterson, E. C. Dick and K. R. Johansson. Influence of dietary aureomycin and carbohydrate on growth, intestinal microflora and vitamin B₁₂ synthesis of the rat. Two figures ........................................... 171

Robert Van Reen and Paul B. Pearson. Magnesium deficiency in the duck. One figure ................................................................. 191

E. W. Hartsook and B. Connor Johnson. Effects of dietary terramycin and methionine supplements on fat and protein gains in weanling rats .... 205

Louis J. Pecora and Benjamin Highman. Organ weights and histology of chronically thiamine-deficient rats and their pair-fed controls ........ 219

Mei-Ling Wc, Evelyn Warren and Clara A. Storyick. Riboflavin metabolism of women on controlled diets. Two figures .............................. 231

H. E. Sauberlich, Wan-Yuin Chang and W. D. Salmon. The amino acid and protein content of corn as related to variety and nitrogen fertilization. Two figures .................................................. 241

P. K. Vijayaraghavan and P. R. Srinivasan. Essential amino acid composition of some common Indian pulses ........................................... 261

Russell F. Miller and Paul H. Phillips. The metabolism of fluorine in the bones of the fluoride-poisoned rat ........................................... 273

B. S. Schweigert and Barbara T. Guthneck. Liberation and measurement of pantothenic acid in animal tissues .................................... 283

L. R. Arrington and G. K. Davis. Molybdenum toxicity in the rabbit. Two figures ................................................................. 295

Te-Ch'in Chou and Abby L. Marlatt. Some factors in the Chinese diet affecting carotene utilization .................................................. 305

Osborne and Mendel Award .......................................................... 317

Borden Award in Nutrition ............................................................. 318

No. 3 NOVEMBER 1953

J. C. Alexander, C. William Beckner and C. A. Elvehjem. The alanine, cystine, glycine and serine content of meat. Two figures ...................... 319

Mary Elizabeth Reid and George M. Briggs. Development of a semisynthetic diet for young guinea pigs ........................................... 341

George M. Briggs, Mattie Rae Spivey and Lucia O. Ortiz. Variation of growth in successive experiments with folic acid-deficient chicks and the influence of aureomycin ........................................... 355

Amos E. Light and John A. Tornabene. Effect of prolonged percutaneous administration of methyl testosterone and estradiol on growing female rats. Sixteen figures ........................................... 365
CONTENTS

J. P. Feaster, R. L. Shirley, J. T. McCall and G. K. Davis. PM distribution and excretion in rats fed vitamin D-free and low phosphorus diets. Three figures ................................................................. 381

S. F. Herr, R. W. Riemenschneider, Hans Kaunitz and Charles A. Slanetz. Nature of the "vitamin A-like factor" in lard. One figure ............ 393

Ann McLaughlin Siliciano and E. S. Nasset. Nitrogen balance and growth of the rat as affected by certain fruits in the diet..................... 403

William A. Price, Jr., M. Wight Taylor and Walter C. Russell. The retention of essential amino acids by the growing chick ...................... 413

Wendell E. Ham and Kendall W. Scott. Intestinal synthesis of biotin in the rat. Effect of deficiencies of certain B vitamins and of sulfasuxadine and terramycin ........................................................... 423

K. J. Carpenter. The concept of an "appetite quotient" for the interpretation of ad libitum feeding experiments .................................. 435

Ricardo R. Rodríguez, Pedro Cattáneo, Bernardo A. Houssay and Bumpei Uno. Unsaturated fatty acids and alloxan diabetes. One figure .......... 441

C. H. Hill and J. W. Kelly. The effect of antibiotics on the growth of chicks raised in new quarters ......................................................... 463

Borden Award in Nutrition .............................................................. 467

Osborne and Mendel Award ............................................................ 468

No. 4 DECEMBER 1953

D. V. Tappan, U. J. Lewis, A. H. Methfessel and C. A. Elvehjem. Studies concerning the pyridoxine requirements of rats receiving highly processed rations ................................................................. 479

Lorin E. Harris, Joseph R. Harris, Farrin L. Mangelson, Delbert A. Greenwood, Clyde Biddulph, Wayne Binns and Mertthy L. Miner. Effect of feeding DDT-treated alfalfa hay to swine and of feeding the swine tissues to rats. Two figures .......................................... 491

R. L. Jacobs, J. F. Elam, G. W. Anderson, L. L. Gee, Jean Fowler and J. R. Couch. Further evidence as to the possible mechanism involved in the growth-promoting responses obtained from antibiotics .......... 507

Luther R. Richardson, Lynn G. Blaylock and Carl M. Lyman. Influence of dietary amino acid supplements on the free amino acids in the blood plasma of chicks ......................................................... 515

A. E. Harper, W. J. Monson, D. A. Arata, D. A. Benton and C. A. Elvehjem. Influence of various carbohydrates on the utilization of low protein rations by the white rat. II. Comparison of several proteins and carbohydrates. Growth and liver fat ........................................................... 523

William J. Darby and others. The Vanderbilt cooperative study of maternal and infant nutrition. I. Background. II. Methods. III. Description of the sample and data. One figure ......................... 539
VII CONTENTS

WILLIAM J. DARBY AND OTHERS. The Vanderbilt cooperative study of maternal and infant nutrition. IV. Dietary, laboratory and physical findings in 2,129 delivered pregnancies. Five figures 565

J. R. BEATON, J. L. BEARE, G. H. BEATON, J. M. WHITE AND E. W. McHENRY. The basal metabolic rate and the effects of thiouracil administration and of thyroidectomy on control and vitamin B₆-deficient rats 599

E. L. HOVE. The toxicity of tri-o-cresyl phosphate for rats as related to dietary casein level, vitamin E and vitamin A 609

H. E. SAUBERLICH, WAN-YUIN CHANG AND W. D. SALMON. The comparative nutritive value of corn of high and low protein content for growth in the rat and chick 623

Osborne and Mendel Award 637

Borden Award in Nutrition 638
