CONTENTS

No. 1 MAY 1955

T. G. H. DRAKE. Biography of Frederick FitzGerald Tisdall with frontispiece 3

NANCY LEE NOBLE AND EVANGELINE PAPAGEORGE. Adrenal glycogen in the guinea pig and in the white rat .......................... 15

M. O. SCHULTZE. Effects of malnutrition in early life on subsequent growth and reproduction of rats ................................. 25

LOTTIE ARNRICH. The effect of hypothyroidism on the metabolism of carotene in dogs. Two figures ................................. 35

ANDREW W. HALVERSON, CATHARINE M. HENDRICK AND OSCAR E. OLSON. Observations on the protective effect of linseed oil meal and some extracts against chronic selenium poisoning in rats .............. 51

HELEN E. CLARK, DOROTHY L. HARRISON, RALPH P. SOULE, JR., AND DRAYT-FORD RICHARDSON. The nutritive value of proteins of muscle from hogs fed diets supplemented with aureomycin or terramycin hydrochloride .. 61

HAROLD L. ROSENTHAL AND JOHN K. HAMPTON, JR. The absorption of cyanocobalamin (vitamin B\textsubscript{12}) from the gastrointestinal tract of dogs. Four figures ................................. 67

E. S. NÄSSET, PEARL SCHWARTZ AND H. V. WEISS. The digestion of proteins in vivo ............................................. 83

MAURICE E. SHILLS, ROSALIE DE GIOVANNI AND W. B. STEWART. Fatty liver of portal type: Effects of choline, methionine, and vitamin B\textsubscript{12} ........... 95

ROBERT C. BALDRIDGE. Blood ergothioneine and dietary oats ................................. 107

M. ELIZABETH MARSH, LOUIS D. GREENBERG AND JAMES F. RINHART. The relationship between pyridoxine ingestion and transaminase activity. I. Blood hemolysates. Six figures ................................. 115

P. A. HEED AND M. O. SCHULTZE. Maternal diet and other factors affecting the lipid content of livers of very young rats ..................... 129

W. S. T. THOMPSON AND H. N. MUNRO. The relationship of carbohydrate metabolism to protein metabolism. IV. The effect of substituting fat for dietary carbohydrate. One figure ........................................ 139

THOMAS H. HAIGHT AND WILLARD E. PIERCE. Effect of prolonged antibiotic administration on the weight of healthy young males. One figure ...... 151

ROBERT A. E. BLEILER, DORIS JOHNSON AND HELEN T. PARSONS. Metabolism of folic acid and citrovorum factor by human subjects. One figure .... 163
No. 2 JUNE 1955

E. L. Hove and H. R. Seibold. Liver necrosis and altered fat composition in vitamin E-deficient swine. Four figures ........................................... 173

A. E. Harper, Marie E. Winje, D. A. Benton and C. A. Elvehjem. Effect of amino acid supplements on growth and fat deposition in the livers of rats fed polished rice .................................................. 187

Alberto Carvalho Da Silva, Rebecca Carlotta de Angelis, Maria Apparecida Fontes and M. F. Mansur Guéronio. The domestic cat as a laboratory animal for experimental nutrition studies. IV. Folie acid deficiency .................................................. 199

Mary Elizabeth Reid. Nutritional studies with the guinea pig. III. Choline .................................................. 215

L. E. Lloyd, B. Elaine Rutherford and E. W. Crampton. A comparison of titanic oxide and chronic oxide as index materials for determining apparent digestibility ........................................... 265

E. Geiger, Ihsan El Rawi and H. V. Thomas. Experiments with intermittent feeding of protein to rats. Three figures ........................................... 273

Roger B. Meintzer and Harry Steenbock. Vitamin D and magnesium absorption ........................................... 285

Arthur Knudson and Raymond Harris. Observations on blood pressure and tissue cholesterol following choline deficiency in weanling rats ........................................... 295

John H. Hopper and B. Connor Johnson. The production and study of an acute nicotinic acid deficiency in the calf ........................................... 303

No. 3 JULY 1955

E. A. Kline, J. Kastelic and G. C. Ashton. The effect of vitamin B<sub>12</sub>, cobalt and antibiotic feeding on the composition of pork tissue of 100-pound pigs ........................................... 321

M. Moinuddin and Orville G. Bentley. Microbiological versus biological vitamin B<sub>12</sub> activity in bovine rumen liquor and feces. Two figures ........................................... 335

Marjorie M. Nelson, Howard V. Wright, C. Willet Asling and Herbert M. Evans. Multiple congenital abnormalities resulting from transitory deficiency of pteroylglutamic acid during gestation in the rat. Twenty-five figures ........................................... 349
CONTENTS

GRACE A. GOLDSMITH, HAROLD L. ROSENTHAL, JANIS GIBBENS AND WALTER G. UNGLAUB. Studies of niacin requirement in man. II. Requirement on wheat and corn diets low in tryptophan. One figure 371

M. L. SCOTT, F. W. HILL, L. C. NORRIS, D. C. DOBSON AND T. S. NELSON. Studies on vitamin E in poultry nutrition 387

KRISHNASUDHA ROHATGI, MATA BANERJEE AND SACHCHIDANANDA BANERJEE. Effect of germination on vitamin B₃ values of pulses (leguminous seeds) 403

ROBERT L. WIXOM, GEORGE E. PIPKIN AND PAUL L. DAY. Interrelationship of serine and glycine for chick growth 409

E. R. MILLER, D. A. SCHMIDT, J. A. HOEFTER AND R. W. LUECKE. The thiamine requirement of the baby pig 423

JAMES S. DINNING, RUTH NEATOUR AND PAUL L. DAY. A biochemical basis for the interrelationship of pantothenic acid and methionine 431

EDWIN T. MERTZ, SHELDON S. RENNERT AND EARL W. COLE. A bacterial method for determining protein digestibility. One figure 437

RUSSELL F. MILLER AND PAUL H. PHILLIPS. The enhancement of the toxicity of sodium fluoride in the rat by high dietary fat 447

H. J. THOMASSON. The biological value of oils and fats. I. Growth and food intake on feeding with natural oils and fats 455

H. J. THOMASSON AND J. BOLDINGH. The biological value of oils and fats. II. The growth-retarding substance in rapeseed oil. Two figures 469

L. EMMETT HOLT, JR., AND SELMA E. SNYDERMAN. The influence of dietary fat on thiamine loss from the body. Three figures 495

ERNESTINE I. FRAZIER, MARY ELIZABETH PRATHER AND ELIZABETH HOENE. Nicotinic acid metabolism in humans. I. The urinary excretion of nicotinic acid and its metabolic derivatives on four levels of dietary intake 501

MARY E. DUMM, BERTRAM LAKEN AND ELAINE P. RALL. Factors influencing adrenal weight and adrenal cholesterol in rats following stress. Four figures 517

DORIS HOWES CALLOWAY AND HARRY SPECTOR. Nitrogen utilization during caloric restriction. I. The effect of dietary fat content. Two figures 533

DORIS HOWES CALLOWAY AND HARRY SPECTOR. Nitrogen utilization during caloric restriction. II. The effect of variation in nitrogen intake. One figure 545

D. M. Hegsted, MARTHA F. TRULSON, HILDA S. WHITE, PHILIP L. WHITE, EDUARDO Vinas, ENRIQUE ALVISTUR, CESAR DIAZ, JUAN VASQUEZ, ANGELICA Loo, AMALIA Roca, CARLOS COLLAZOS Ch. AND ALEJANDRO RUIZ. Lysine and methionine supplementation of all-vegetable diets for human adults 555

No. 4 AUGUST 1955
