The American Society for Nutrition (ASN) proudly offers the most important sources of nutrition research and reviews in the world, including the first and the most prominent journals in our field. Together they make up the Nutrition Science Collection, publishing an array of research that reflects the direction and shapes the future of global nutrition.

The Nutrition Science Collection includes:

- **The Journal of Nutrition**, the first scientific journal created solely for publication of nutrition research, with a reputation for rigorous peer review and a decades-long legacy of publishing highly original research whose findings directly influence health and nutrition policy worldwide.

- **The American Journal of Clinical Nutrition**, the highest ranked peer review journal in the field, named one of the most influential publications in biology and medicine over the past century by the Special Libraries Association, featuring basic and clinical studies regarding human nutrition from researchers in more than 90 countries.

- **Advances in Nutrition**, delivering reviews of the most current, reliable evidence on all facets of nutrition, with a diverse, global point of view and a rapid submission-to-publication schedule to keep pace with the accelerating demand for the latest breakthroughs in nutrition science.

- **Current Developments in Nutrition**, new in 2017, an open-access journal publishing a broad scope of nutrition research to extend knowledge of nutrition through basic, multi-disciplinary, and clinical research to improve public health and clinical practice worldwide.

Researchers, policy makers, and practitioners rely on ASN’s Nutrition Science Collection to keep up with:

- Cutting-edge research in the rapidly evolving field of nutrition science and its clinical implications.
- The latest findings linking nutrition to optimal health and well-being.
- The role of nutrition in the prevention of diseases and health disorders.

Nutrition Science Collection

THE JOURNAL OF NUTRITION
The premier publication in its field since 1928, The Journal of Nutrition (JN) continues to uphold its founding commitment to being first to offer the best original nutrition research on humans and animals. Articles in JN are among the most frequently cited, most highly recommended materials in the nutrition and dietetics community, and are available online – ahead of print publication – within one month of acceptance. Researchers, health professionals, and policy makers who depend on the very latest data to inform critical decisions have trusted JN for more than 60 years to keep them up-to-date on developments.

2015 IMPACT FACTOR: 3.740
(#6 among primary research journals in nutrition)

2015 TOTAL CITATIONS: 35,186

FIVE-YEAR IMPACT FACTOR: 4.497

h5-index of 68, ranked #2 publication in nutrition by Google Scholar

Cost per page: $0.32
(#3 value among competitive nutrition publications)

THE AMERICAN JOURNAL OF CLINICAL NUTRITION
The most highly ranked peer-reviewed, primary research journal in the nutrition and dietetics category, The American Journal of Clinical Nutrition (AJCN) publishes the latest research on topics in nutrition, such as obesity, vitamins and minerals, nutrition and disease, and energy metabolism. Findings published in AJCN regularly inform the development of public health guidelines issued by governments, foundations, and professional organizations; and top-tier news media including the Washington Post, L.A. Times, Forbes.com, and others routinely cite AJCN research.

2015 IMPACT FACTOR: 6.703
(#1 among primary research journals in nutrition)

2015 TOTAL CITATIONS: 53,346

FIVE-YEAR IMPACT FACTOR: 7.409

h5-index of 97, ranked #1 publication in nutrition by Google Scholar

Cost-per-page: $0.22
(#1 value among competitive nutrition publications)

ADVANCES IN NUTRITION
Launched in 2010, Advances in Nutrition (AN) was immediately influential, earning an Impact Factor that placed it among the leaders in the field in its first year of eligibility. With a reputation for innovative, high-quality content and rapid publication schedules, AN explores and synthesizes the current state of knowledge across all dimensions of nutrition science. The journal publishes reviews of recent research and on key findings for a broad audience of biomedical researchers, clinicians, epidemiologists, public health professionals, and academics – with a focus on recent progress in the field rather than historical developments.

2015 IMPACT FACTOR: 5.201
(#7 among all journals in the nutrition and dietetics category)

2015 TOTAL CITATIONS: 2,001

FIVE-YEAR IMPACT FACTOR: 6.811

h5-index of 50, ranked in top 10 publications in nutrition by Google Scholar

Value (Cost per page): $0.46
(#4 value among competitive nutrition publications)

CURRENT DEVELOPMENTS IN NUTRITION
The American Society for Nutrition (ASN) continues to develop to meet the changing needs of the nutrition research community. Current Developments in Nutrition (CDN) provides authors an open access platform for publishing articles across an expanded range of nutrition research. A simple submission process, accelerated peer-review, and immediate online publication are designed to swiftly disseminate new ideas and important discoveries to the global research community. Areas of new and added emphasis include:

· Eating behavior and DIETETICS
· Food and Nutrition POLICY
· Nutrition EDUCATION
· Nutrition and EXERCISE physiology
· Human and animal food COMPOSITION
· Agricultural FOOD SYSTEMS methods
· FOOD SCIENCE effects on nutrition
